home?

A. You may use your leather solas with the marble floors. However, since you have used them in your living room, who to change and try them in your library or family room? I agree with your interior designer on the various trims for architectural cetail. The sleek lines of modern or contemporary are a wonderful surprise with the traditional trim. Q. My under certains in my living and dining rooms are dacron-polyester. I was told the fabric is machine washable.

Q. We are building a new home. The house will have 4,000 feet of living space. Our ceilings are nine and 10 feet high. The floors will be marble. We like a contemporary look.

We now have two navy blue leather sofas in our living room. Can we use them in our new home with marble floors? Our interior designer has suggested raised panel doors, crown moldings and various trims. Are these appropriate for our new home?

Should I try to do them myself? A. If your curtains have a rod pocket you should have no problem handling them. If they are pinch pleased, I suggested sending them out. I personally have sent my curtains and draperies to the Custom Drapery Cleaners in Hamtramck. They do a wooderful Job — they not only remove them, but rehang them

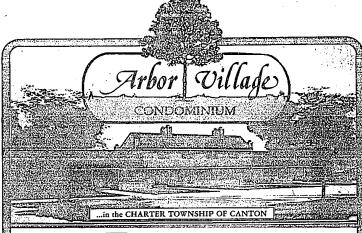

Very frequently I am asked how long one should wait to have curtains and draperies cleaned. My answer is that unlined curtains should be done once a year. Lined draperies that are vacuumed frequently can go for two to three years.
