Little Piggies...Big Problems

This little piggy went to market. This little piggy stayed home. The rhyme for simple little feet. Yet, the foot is really a very intricate organ. One that can be affected by heart disease, kidney ailments, diabetes and other major problems.

In a lifetime, this complex organ will carry the average person 15,000 miles. It's no wonder then that 90% to 95% of all older adults suffer from painful foot problems such as minor corns, calluses and warts. Other problems seen are hammer toes, contracted toes, heel spurs, bunions, infections, fractures and ankle sprains.

DR. DAVID UNGAR has been identifying and treating minor and complex disorders of the feet and ankles with an emphasis on conservative and informed care.

Get serious about your little piggies. Call Dr. Ungar for an examination or more information.
