Single outly would also have to the art familities and to the art familities and the art familities and possible valuable in the second of the art familities.

Office STER would draw high futerity away from their firsts for fail day assents as recorded math and ser-ble according to pursaris to be according to the state of the first without set odds and by the state of t

The proposed math and science center has strong support, including an offer to equip two laboratories and access to a new wind tunnel.

- David C. Houset scietice consultant Oakland schools

Keane expects to take a concrete step toward developing the center Tursday when he discusses hiring an interim director with intermediate school officials.

The interim director would help hire teachers and devise the high-powered currendum needed to attract the best and brightnest students. David C flowed, seeing consult and for Oakhand Schools, said the center will likely be besterf within the Fontiar School District hopefully mear the intersection of M-59 and 1.75.

Get a great the matter and the contract of the contr

the Douthar School District, more only men the intersection of Mode and 173.

"That's near the population content of the county, he said. And the freeways would make it more excely accessible.

At one time infinial thought they had a site. Housed and an atomological Pointar, school building. But it would have cost 12 fulfillion to bring it up to code, he said, "We don't have that kind of maney, ne we're still looking."

WHILE THE CENTER'S backers dent have \$2 million to renovate a failling they do have very strong support—in other respects [Heisel]

said "Companies and business leaders have pledged their support," he said, including one company offering to equip two laboratories and another offering limited access to a new want frome.

requir two laboratories and another offering limited access to a new wind tunnel.

State school officials have also made verbed pledges of state ad-omething in the neighborhood of 1200 tools he said.

The center hopes to eventually operate with about 100 toolens. That is not 1200 tools he said.

The center hopes to eventually operate with about 100 toolens. That we can select the few as 75% board state with as few as 75% board said. There is an outside the property of the said of t
