Paradigm shift initiates change

Q: Last week, you discussed the meaning of proactive. There's another word I hear a lot but don't understand and that's paradigm.

A: You're right. Paradigm is another popular word for which the dictionary won't give you a satisfactory explanation. Originally a Greek scientific word, "paradigm" today means a model, theory, perception, assumption or frame of reference. It refers to the way people "see" the world, not vision but rather the way we understand or interpret it.

People's perceptions can be divided into two categories: realities (the way things are) and values (the way we think things should be). We assume the way we see things is the way they are or the way they should be, yet this may not be the case.

Many years ago, Harvard Business School demonstrated two people can see the same thing, disagree, yet both be right. Students were asked to view a black and white drawing which, when viewed through one perspective, looks like an old woman with a big nose.

By interpreting the same picture differently, however, the nose melts into a slender chin, form-

ing the outline of a glamorous young woman. This is a graphic example of the different ways people "see" life.

Our actions are derived from our attitudes and behaviors, which are based on our paradigms, or the lens through which we "see" the world. For instance, if we see a rugged-looking man menacing a well-dressed woman with a gun, we might perceive the man has ill intentions and something should be done to thwart the man's threat. This would be our paradigm.

The more bound a person is to see life only one way, the more powerful the experience is when new light is suddenly focused. This is called a "paradigm shift." For example, if the man in the

forgoing scene turned out to be a plain-clothes policeman and the woman an escaped convict, our paradigm would change (shift).

Paradigms have important implications in every aspect of life, including order. The right-brain-dominant person, for instance, hardly sees clutter, while the left-brain-dominant, highly structured person may perceive clutter as totally unacceptable.

Paradigms can mean the difference between being "stuck in a rut" ("We've always done it that way") and being open to innovative strategies. Looking at problems through the eyes of others can enhance personal relationships or teamwork between corporate departments.

A paradigm shift can be an instantaneous (Aha!) or a slow and deliberate metamorphosis. It can be the willingness to step outside our comfort zone to risk changing jobs, to suddenly understand how to use a computer software program to save time, or to try a new filing system.
