

Get accustomed to studio with Fishbowl Concept

The Fishbowl Concept was one of the trademarks of the original community television. This is where a camera is pointed into a scene such as a park and left aimed and live. This way, whatever goes on is telecast.

Our new television facility is also wired for this effect.

MetroVision's Dan Hannigan designed a system so that our public meeting room and my office can see and hear what is being taped in the studio. It is a great way to become accustomed to the T.V. studio without feeling threatened.

We have added a picnic table out back so that you have a place outside to relax in between takes.

Call us to see what is being videotaped in the studio so you can stop by and view it.

REDUCE YOUR CHANCES OF GETTING HEART DISEASE, KIDNEY DISEASE OR GOING BLIND.

Obesity can start a chain reaction to poor health that can be devastating.

To begin with, most physicians and researchers consider obesity to be the major cause of diabetes in adults. Up to 90% of adults diagnosed as having diabetes, in fact, are overweight.

Of course, once you have diabetes your chances of developing heart disease, kidney disease, or going blind increase dramatically.

As a person with diabetes you'll be twice as prone to heart disease. 17 times as prone to kidney disease. And 25 times as prone to blindness, if you are insulin-dependent.

Diabetes, in fact, can shorten your life expectancy by one-third.

Fortunately, diabetes in adults, in most cases, can be prevented with careful weight control, healthy eating habits, and regular exercise.

So if you're overweight, doesn't it make sense to take off the extra weight? Instead of years off your life?

FIGHT SOME OF THE WORST DISEASES OF OUR TIME.
Support the American Diabetes Association.
