PAN-ACE-A
puts hens in laying trim

YOU want music in your poultry yard—song, scratch, clack.

You want an industrious hen. A fat, lazy hen may be all right for pot-pie but for egg-laying—never!

Add Dr. Hess Poultry Pan-ace-a to the ration daily and see the change come over your flock. See the combs and wattles turn red.

See them begin to cheer up and hop around. See the claws begin to dig in.

That's when you get eggs.

Value of Earth's Gems
Five Billion Dollars

Although the emerald is the oldest of precious stones of which we have any record, in later times the diamond has become the standard and favorite, says the Houston Chronicle.

Dr. George F. Kunz, a diamond authority, recently has completed a survey of the world's store of gems and he reckons the value at billions. The ruby mines of Burma have been worked for centuries and they are still producing heavily, nearly \$10,000,000 being discovered during the last 35 years.

Doctor Kunz computes the value of diamonds in the world today at \$5,000,000,000 and it is generally conceded that the world's supply of gold is somewhat less than \$3,000,000,000, most of which happens at this time to be in the United States, even as a large share of the world's jewels are also here.

Of the new production, Doctor Kunz says, the United States consumes 50 per cent more of the diamonds and precious stones than all the rest of the world combined.

Odd Indian Custom

Among the Arhuaco Indians, a tribe inhabiting one of the mountain fastnesses in Colombia, it is the custom for a man to reside in a house by himself after marriage, while his wife lives alone in a neighboring house; they eat together outside the door of the wife's house.

Gone
"It's all off now," sighed the bald as he looked in the mirror at his bald head.—Notre Dame Jangler.

Fewer Predatory Animals

Considerable progress has been made during the past four years in the control of predatory animals. During this period 2,542 wolves, 695 lions, 1,623 bobcats and lynxes, 497 bears, and about 380,000 coyotes have been destroyed in these campaigns. This represents a direct gross saving to stock growers of not less than \$23,000,000, at a cost of \$1,101,820 to the Department of Agriculture and \$1,040,276 to co-operators.

Boon to Pianists

A machine has been invented for limbering up the muscles of pianists' fingers. The natural tendency is for all the fingers to work together. To counteract this, an apparatus has been devised that makes every finger move separately. Five minutes of machine exercise, the inventor claims, is equal to half an hour of technique practice.

Gale Through Conduit

In order to draw off the poisonous fumes from the 46,000 automobiles that will make daily use of the vehicular tunnel under the Hudson river, an "airway" has been laid under the traffic road through which electric fans will drive a 75-mile gale to carry off the poisonous gases.

NEW EQUIPMENT
FOR THE FORD

Wire wheels, windshield wipers, gypsy curtains, top boot, double car bumpers, and automatic windshield wiper are being added to the items of special equipment manufactured by the Ford Motor Company. The first public display of this equipment will be during the Ford National Show Week, January 9-16.

These specialties are not "extras" but have been so designed by Ford engineers as to become actually part of the car. (Stamped with the trade mark of the company in its familiar script, the equipment has the identity of genuine Ford parts and is held to the same standard of quality as the car itself. Behind them lies extensive experiment to determine the type and construction best adapted to Ford cars; experiment which was unhampered by any compromise necessary to permit adaptation to some other kind of car.

The introduction of these specialties conflicts in no way with the company's policy of refraining from dictating to a purchaser the amount of equipment he must buy with his car. Those to whom economy is the principal consideration will in future, as in the past, be able to purchase Ford cars in which the standard equipment will include only those features essential to satisfactory operation. On the other hand, to those who are interested in the completely appointed car will be available specialties produced according to the same standards of quality which are incorporated in the car itself.

NOTICE TO TAXPAYERS

The tax roll for 1925 is now in my hands for collection of state, county, and school taxes. Collection of same will commence Monday, December 21, 1925, when taxes may be paid until January 10, 1926 without payment of the 3% additional fee.

Commencing Monday, December 21 I will be at the Farmington State Bank during banking hours for the collection of taxes. The following week at the Peoples State Bank of Farmington and then alternating weekly between the two banks.

LEWIS C. THAYER,
Treasurer of Farmington Township, Mich.

Birds That "Drum"

The biological survey says that the ruffed grouse is the bird which produces the drumming sound. Partridge and pheasant use both terms applied locally to ruffed grouse, and in that sense it may be said that both the partridge and pheasant produce such sounds. The ruffed grouse is called partridge in the North and pheasant in the South.

Mrs. Otis Jensen, accompanied by Mrs. Gene Hill of Middleville, who had been her guest for two weeks, motored to Tustin to spend Christmas with Mr. Jensen's brother, Harry Jensen and family.

FARMINGTON DEFEATS NORTHVILLE

Farmington Athletic club won from the DeMolay Boys of Northville, 27 to 20 last Monday night. It was the second game played and won this season. They have purchased their own suits and the bright green shows up well on the floor.

The Athletic club schedule includes both Class B and Class A teams of Detroit and vicinity, and our boys are hoping to show how good they can play.

The team is composed of the following players: Rapous, Capt., Wixom, Salow, Staman, Banfield and Walling.

Next Monday, January 4, they play an Edison team of Detroit.

SHORT COURSES OPEN
NEXT WEEK AT M. S. C.

A number of agricultural short courses, planned especially to give practical training for the farmer or the man who intends to take up farming, will open at the Michigan State College on Monday, January 4.

The "short courses," which are open to anyone in the state over 16 years of age, prove especially popular with the men who for any reason do not want to take the full four courses in agriculture at the state college, but still want instruction along definite lines of the farming industry. The courses vary in length from two to sixteen weeks.

Among the courses which start on January 4 are General Agriculture, Poultry, Dairy Husbandry (manufactures and production), Horticulture, etc.

Nickel in the Body

Among the metallic substances traceable in the human body nickel must now be included. It does not occur in the fats or in muscular tissue, but is found associated with keratin, the chemical base of hair and nails, and also in the liver.

Hain't the Ratio Increased?

We are informed that five babies are being born every minute in the United States. If the old Barium ratio still holds good, the proportion of suckers only amounts to 20 per cent. Still, we should say, after some recent observations, is a bit encouraging.—Fort Wayne News-Sentinel.

Another High Cost

It used to be when you danced you had to pay the doiler. Now you have to come across and satisfy a whole orchestra.—Memphis Commercial-Appal.

LOST—1926 license; plate Saturday evening. Finder please leave at Enterprise office. 8-1-c

How to Avoid
Fuse Blowouts

The blowing of a fuse is a great annoyance. It always comes at the moment when you have least time to lose. But don't blame the fuse, which is only protecting you. Your's is the blame.

The ordinary light outlet will safely carry a load of 1000 watts. Don't give it a heavier burden or it will "blow." That's what it is there for—to save you from trouble.

Look at any electric appliance that you use and note the number of watts required to run it (stamped on each appliance). That will guide you. The same goes for lamps.
