Gasoline Is Better

Erect and Decorate in a Jiffy

Speed up your new building—or remodeling job—by using Sheetrock, the fireproof wallboard. A standard building material—in broad, ceiling-high sheets ready to nail to joists or studs. Makes enduring walls and ceilings that can be immediately decorated. No waiting for walls to dry—no danger of freezing. Nothing better for winter building; dependable and economical at all seasons.

Because Sheetrock does not shrink, warp or bulge, and has a wonderfully even surface, you can use any decorative scheme. Satisfactory results are obtained with wallpaper, paint or calcimine—with or without panels. Easy to erect—easy to decorate—never wears out.
