

HERE'S WHY 1926

CIRCUS IS BIGGEST

Ringling Bros. Enlarge Greatest Show on Earth to Dedicate New York Edifice

A circus so big that it requires two added rings, eight stages, a wider hippodrome track and a 700-foot-long big top to display its marvels is now headed this way. It is the Ringling Brothers and Barnum & Bailey Combined Shows, to give performances at Detroit July 9 and 10.

The five rings now used have been made necessary to present the added attractions got together in the spring to celebrate the combined shows first appearance in New York's New Madison Square Garden. This edifice is the biggest ever built for circus purposes. To fittingly dedicate it the Ringling Brothers themselves spent months in Europe mobilizing the biggest circus in history. This same show that for weeks entertained New York's millions is now on tour under canvas.

The tournament is as brilliant as in the past but has been enlarged by the addition of such novelties as zebras and llamas broken to harness and hitched to gem-studded floats. We have elephants ride at the tops of allegorical cars. The menagerie of more than a thousand animals embraces as such features as thirteen elephant youngsters with the smallest stationed side by side with the biggest pachyderms in captivity. Another importation is the largest and handsomest tiger of which there is record.

Performing horse acts are now presented in quintet—a troupe in each of the five rings. Those elephants who are performers appear in similar formation—five herds at one time. The number of men and women acrobats, bareback riders, gymnasts and high-wire performers has been increased to eight hundred and fifty trained horses, two hundred of which appear in a single display. One hundred double length cars are required to handle this gigantic amusement enterprise.

Enterprise Liners bring results.

What a splendid idea it would be if all the new graduates would agree to start in as low as five thousand a year.

Everybody Loses When Timber Burns

Six Rules For Preventing Fire In The Forests

1. **Match—**Be sure your match is out. Break it in two before you throw it away.
2. **Tobacco—**Be sure that pipe ashes and cigar or cigarette stubs are dead before throwing them away. Never throw them into brush, leaves, or needles.
3. **Making Camp—**Before building a fire scrape away all inflammable material from a spot 3 feet in diameter. Dig a hole in the center and in it build your camp fire. Keep your fire small. Never build it against trees or logs or over brush.
4. **Breaking Camp—**Never break camp until your fire is out—dead out.
5. **Brush Burning—**Never burn slash or brush in windy weather or while there is in the slightest danger that the fire will get away.
6. **How to Put Out a Camp Fire—**—Dig the coals while working them with water. Turn small sticks and branches both sides. If you can't get water stir in dirt and tread it down until packed tight over and around the fire. Be sure the last spark is dead.

Michigan is the nation's playground. Last year 2,500,000 vacationists enjoyed Michigan's natural beauty. And summer visitors spent \$200,000,000 last year in Michigan.

For here are giant forests . . . wooded wilderness rich in primitive attraction . . . wildlife . . . an ideal vacation land.

It is the duty of each resident of Michigan to preserve this natural beauty. For each resident benefits by Michigan's resources.

Last year forest fires burned over 725,928 acres. These fires in addition destroyed a proportionate amount of property and the cost to suppress them alone amounted to \$125,042.88.

Extinguish camp fires . . . break your match . . . "Heel In" your lighted cigar, cigarette or pipe ashes. Don't scatter refuse. For EVERYBODY loses—when timber burns.
