

Breakfast Is Ready

BREAKFAST is the pleasantest meal of the day, or should be. It follows the night's rest and brings the family together with restored vigor and fresh hope of the heart's desire.

Electric table appliances go far toward making breakfast a thoroughly satisfactory beginning for the day's activities. The housewife, especially, will appreciate the ability to serve delicious dishes without getting up from her chair.

Waffles electrically made on the table and served hot and brown are a delight. Table-made electric toast is a pleasure to eye and palate alike. Coffee prepared in an electric percolator has a quality rarely found in the kitchen-made article. And the cost of running any of these appliances is not more than 2 or 3 cents an hour.
