WHAT EVERY MAN SHOULD KNOW ABOUT IMPOTENCE.

IT'S TREATABLE.

The real tragedy of impotence is letting it go untreated even one more day. Stop denying yourself and your sexual partner an important part of your life. Impotence can be treated in almost every case.

The STAR[®] program developed by Grace Hospital provides complete diagnosis and treatment of male impotence. This confidential program is directed first at determining the cause of the problem. Diseases such as diabetes, cancer, multiple sclerosis and problems with prostate, heart and high blood pressure are common causes. There are many others. Injuries to the spinal cord, and low hormone levels can also cause erection failure. So, too, can

fatigue, alcohol, drugs, smoking, stress and depression. Medicines used to treat such things as depression, high blood pressure and ulcers can be part of the problem. Age alone is not a cause of impotence. And, yes, some impotence problems are psychologically based; even organic impotence has an important psychological component that requires identification and treatment. An accurate diagnosis is the key to effective treatment. Sometimes, only a change in medication is needed. More serious problems may require surgery. But help is available. Complete, confidential and supportive. Call today and talk to one of our professionals.
