## FLINT CHAMBER WARNS AGAINST PROMOTER OF "CALENDAR FOR CHURCH"

"CALENDAR FOR CHURCH"

The Flint Chamber of Commerce sends out a warning against the activities of "a certain P. A. Hansen" who recently operated an advertising scheme in Flint. "Hansen, or Hensen is accomanied by a woman. Their scheme is to get permission from some minister to put out a calendar bearing the church's name. Around the edges of the calendar ree small ads, about 18 in number. This permission is secured by elephone and the ads are sold in he same manent.

The rate in Flint varied from 55 to \$10, according to the space. They agreed to print 2,000 such calendars and to distribute them

among the church congregation and other householders. We have authentic information that only 100 calendars were printed, just enough to place in the hands of the advertisers and allow the young lady to cold ict the money. The selling was dis so on the telephone one day, and the copy made up and calendars wrinted and deliverd the next.

By the time thrie days elapse the money is collected and the persons have left town.

Mr. John N. Wheeler,
Denr John:
You sent me a quotation from a
so-called, is, may be, or what have
you, a Dr. Will C. Duran, "A man
past thirty is incapable of love..."
Personally, I have never had the
displeasure of meeting the doc and
the displeasure is no doubt mutual,
but with one peek at the doc's pan
I can easily understand that the doctor looks like more or less of a sedate, quiel sort of gent and could
easily be credited with assuming the
same that the doc passed the thirt
tleth year of his life and might be
even now on the bone stretch. The
older they are the harder, they fail

limit to love.

older they are the nartest they not to the bank—that there is any use limit on love.

In these days the doc can't be "raided off for trying," It wouldness to be necessary to stop at a filling station to se that the doc is running on a fast thre. In fact it would be easily noticed by a quick sequint at the picture of his philosophical bean that the foctor surses a neatly clipped fock of Sea indders on the only motive portion of the busses shall, in destirty known as the paraling space of the lower molars, in the world stown as the paraling space of the lower molars, in the world stown as the jaw, or to be more to the point what is known in the secolar set of Medison Square Garden as the "button."

Garden as the "button."

If the doc can prescribe human activity in a couple of lines then I can diagnose his own statement by a slant at his map.
One can also notice, even two could notice, that the doc filters the fresh air to his believe with the degree to the country of the sense of smelling, not block and the country for the sense of smelling, not block on the sense of smelling, not block on the sense of smelling, not block on the sense of smelling, not block of the sense of smelling, not block of the sense of the
