REFRIGERATION

by
ICE OR ELECTRICALLY
is a
HEALTH NECESSITY

When food is kept from day to day, some means of refrigeration is absolutely necessary. Above a temperature of 50° food decays rapidly and health is endangered. Refrigeration means economy, too, because less food is wasted through spoilage.

frigeration—an inexpensive health protection. You will use less ice and keep your refrigerator cooler if you keep the ice compartment well-filled at all times.

The unquestioned convenience of Electric Refrigeration makes it ideal for the modern comfortable home. Once the Electric Refrigerator is connected it rarely requires attention. An Electric Refrigerator is more than a means for preserving food.—It is an Electric Appliance for preparing tasty frozen recipes of all kinds the year 'round.
