FIRE PREVENTION WEEK

Of all the special weeks during the year, "Fire Prevention Week" must rank high in national importance. The loss of life and property in the United States annually by fire is most staggering. Most of this loss of life and property is due to carelessness. October 7-13 has been designated as "Fire Prevention Week." Now is a good time to study some of the things that can be done to stop this gigantic waste. Concerted effort is the only prevention.

Carelessness causes most fires. Every fifteen minutes someone's home catches fire. Fifteen thousand burn to death each year in America.

Help prevent fire. Be careful. As the days grow cooler, and fires are necessary in stoves, fireplaces and furnaces for comfort, the danger of losses increases. It is important, therefore, that flues should be examined, cleaned, and repaired where necessary.

Not all losses of property and lives, by and means, are caused by defective flues. A frequent source of danger is rubbish collected in basements or in and around buildings. A general clean up is an effective method of fire prevention.

Statistics show that over \$1,000 worth of property was destroyed every minute, and a life was lost every 35 minutes last year through fires. Thirty million dollars in losses were caused by careless smokers. They should be remembered that there is always danger in the discarded cigarette or cigar stub.

Common suggestions on fire prevention include the following: Keep matches in metal boxes or where children cannot reach them. Don't keep ashes in wooden boxes or deposit them against wooden buildings or partitions. Don't change your electric wiring without consulting a competent electrician.

Don't hang electric light cords on nails.

GENUINE FORD BATTERY \$850

Allowance made on your old battery. For all makes of cars and radios

Use metal protection under all stoves and protect woodwork where stoves or furnaces are close to walls.

Don't pass stovepipe through ceiling, roofs or woodwork partitions.

Every open fireplace should have a screen. Don't use gasoline or benzine to clean clothing near an open flame, light or fire.

Don't use kerosene, benzine or naphtha in lighting fires or to quicken a slow fire. Don't use liquid polishes near open lights. Many such compounds contain inflammable oils.

Don't go into closets with light. It is evident that favorable action upon the suggestion by the general public would greatly decrease fire losses the coming year.

REV. PALMER TALKS TO WALLED LAKE EXCHANGE

"Character Building" was the topic of a talk given by Rev. E. W. Palmer, of the Farmington Baptist Church and secretary of the Exchange Club of Farmington, to the Walled Lake Exchange Club at their meeting last week.

Rev. Palmer, interspersing his talk with stories and illustrations said a man is either "mixing mud," "earning ten dollars a day" or "building a cathedral" at his daily work, depending on the mental attitude of the man. He spoke of the value of teaching the youth courtesy in business, and of the pride afforded in being able to look upon things done for a boy or girl, which has helped them be better citizens.
