GIOTTO, one of the greatest artists the world has ever known, found encouragement that led to fame, through the interest of another famous artist, Cimabue, who discovered the young genius tending sheep. The art of Giotto showed even in the rough drawings he made on rocks in the pasture. The great Lily Tower of Florence, Italy, built in 1334, is a monument to Giotto's talent.

Every boy and girl has talents of some kind. Their development depends on the impressions of school days. No impression is more conducive to character building and a successful career than that of thrift—learning to save. We welcome children's accounts and urge parents' encouragement.
