subdued, made of earth tone bricks and metal roofing. Floors include wood parquet, marble and

bricks and metal rooting. Floors include wood parquet, marble and onyx.

The most dramatic change in Catholic church design occurred in the 1960s with Vatican II, a papal-inspired dramatic departure from centuries-old tradition.

"Before that, churches were basically rows of seating with long aisles. The altar was way to the front. The priest said Mass in Latin with his back to the congregation," Brown said.

"With Vatican II, the altar was moved closer to the people. Different acoustics were required. Fon-shape seats clustered around the altar. Even Protestant churches became wider. We worked on a Methodist church where all the furniture was moved to the mid-

nte." Teefey notes another change in Catholic church architecture is size and location of the baptismal font, from small and unobtrusive to large enough for full body immersion and prominently located in the nave, near the front doors.

cated in the nave, near the front doors.

"There is a lot more participation (in Catholic worship) and less observation," Teefey said. "Culture and religion play an important role in the design."

Brawn says that each church project eventually takes on the personality of its priest or minister.

"Many years age, I designed Chareneeville Methodist Church in Livonia, I first spake to the minister on the phone, She had a very deep voice. When I met her, I was abucked to find a woman. Woman ministers were rare then.

"Her name was Elsie Johns and she took over a very small church and bullt it up. She was a deer. With a building committee, we designed a church fellowship hall, then a sanctuary. A choir room came later. It's a white building. It's sort of a gentle church, a reflection of the minister.

"She passed away many years ago, but the church hasn't changed at all. I get back there once a year."

Currently, the firm is designing St. Jerome's Catholic Church in Troy. The old parish, on Elgin St. Jerome's Catholic Church in Troy. The old parish, on Elgin Mile east of Woodward in Detroit, is an ethnic Creatian church trying to maintain its language and customs.

Thus, the new church, on 14 acress off Wattles cast of Livernois, will maintain a Creatian identity. There will be a 400-and identity. There will be a 400-and rectory/office to serve a membership scattered throughout the metro area.

"The church is a unifying thing." Brown said. "Members are very disturbed by the war in the furmer Yugoslavia. Each committee meeting starts with a group clustered around shortware radio from Sarajevo."

Construction on the \$2.5 million church is due to begin ack

coup custacered around shortwave radio from Sarajevo."

Construction on the \$2.5 million church is due to begin next spring, "We can't duplicate the stone but it will have a rugget, rusticated surface and stucco," Brown said.

Added Teefey: "The building will have a strong Mediterranean flavor, fairly traditional outside. It will have a terra-cotta metal roof. Each building will have a separate identity but he joined together."

Six acres have been set aside as

Paster Joe Galie says the church is moving out to where its congregation lives, "We are a small parish and most of the peo-

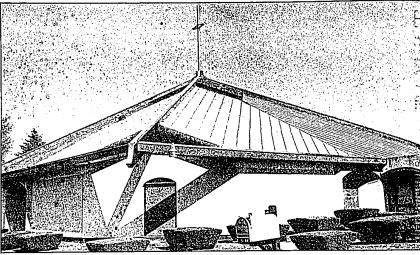

ple are gone from here," said Fa-ther Galic, ordained in Sarajevo in 1966 and who came to the U.S. the following year. "Everyone is excited about it. We like to have something new but old-fashioned

too, kind of Croatian and Medi-

Funding will come from parish-loners and an Archdiocesan loan. A shrine and a statue of St. Jerome will be taken from the old

to the new church.

Brown Associates has designed churches throughout Michigan and in Delaware, Pennsylvania, Illinois, Maryland, Maine, New York, Ohio and West Virginia.

Durable design: Clarenceville United Methodist Church in Livonia is a gentle church reflecting the personality of former minister Elsie Johns, who worked with Brown Associates on its design back in the 1960s.

AH&M, headquortered in Massachusetts, maintains a network of affiliates and contract agents throughout the Americas, Europe and the Pacific Rim.

Even scientists are setting their sights beyond borders. RHK Technology Inc. of Rochester Hills has begun delivering on electronic imaging system that helps researchers in physics, chemistry and other sciences visually explore molecules and atoms.

The new 3-D imaging system reveals molecular surface features that resemble mountain peaks, deep fissures and Martian-like desert. "Now we can see what has never hear visible," said Brad Ort, University of Michigan physics professor.

Customers include Philips Research Laboratories in the Netherlands, Tel Aviv University and the University of Hong, Rong.

Recently invented, scanning

Rog.
Recently invented, scanning probe microscopes are helping scientists understand familiar and exotic materials. They are

being used to investigate materials for hypersonic aircraft and space vehicles, superconductors and pharmaceuticals as well as industrial cutting tools, automotive alloys and future consumer products.

Morellon & Shields is a new public relations firm with offices in Livonia and Windsor to service cross border business. It's unique in that its partners include one American, Robert Morellon of Northville, who has a public relations background, and a Canadian, Bill Shields of Windsor, a journalist who covered business and automotive beats for the Windsor Star.

automotive beats for the Windsor Star.

"With the free trade agreement, commerce is moving back and forth across what is called the world's friendliest border," Moreillon said. "Canada is not as foreign as Japan, but there are subtleties that can mean a world of difference in the business world. We're talking to three or four compairs right now that want to take advantage of the Ameri-

can market."

Meanwhile, Caz Internation al Inc. of Southfield provides building design and engineering services and helps its elicits understand the language, customs and building trade practices of Mexico.

"Sometimes, the knowledge of local customs can spell the difference between success and failure of a business venture,"

difference between success and failure of a business venture, said Gabriel A. Carrille, of Fermington, president of CAZ International.

An American-educated native of South America, the professional engineer and general contractor Carrillo has managed construction projects in Mexico, other parts of Latto America, the Carlibbean and the Middle East.

He said American commonity of the Carlibbean and the Middle East.

He said American compa-nies that build factories in Mexico and other countries of-ten spend more time and monby then necessary because they aren't familiar with the way things work in the construction industry in those nations.

"It isn't enough just to speak

Spanish. There is a whole culture that must be appreciated," said Carrillo. "Sometimes, the most important part of any conversation is the subtle mes-

conversation is the subtle mes-sage that comes through with-out any words."

Michael Mercier, president of the 2,000-member Troy based Metro Trading Associa-tion, has been elected to lead the newly formed Corporate Trade International, an affilia-

lumber products to a Canaman company.

"Because of recent U.S. Gov-ernment plans to limit logding on federal timberlands, this program will provide a partial answer to the lumber shortages that will occur," said William B. Harrington, Eagle Bear president. "It will also have a

tion of trade exchanges from the United States, Canada, England, France and Austra-lia.

"In my role as president, I expect to contribute to the or-ganizational structure and pro-cedures that will enable us to realize the objective of bartering agreements among major international corporations," Mercier said.

Metro Trading Association serves as a facilitator for companies looking to exchange goods and services with other companies. Members trade their excess inventory or excess capacity with other members in a debit/credit arrangement, using trade credits instead of cash. At a S10 billion a year pace, barter is one of the fast-st-grawing lusinessess in the U.S. necording to the NTA.

Southfield firm sells Russian lumber

Eagle Bear Associates, a Southfield company doing business in the former Soviet Union, has signed a \$2 million contract to deliver Russian lumber products to a Canadian company.

positive affect in holding down lumber costs."
Eagle Bear was founded three years ago to focus on business opportunities in the former USSR. "Our morket is saturated with products here," Hussia has 300 million people; China has 1 billion. They'll be interested in buying American products."
Harrington and three other Michigan businessmen are going to Siberia this month to teach fundamental business

techniques at a state university there. "(Russians) are good in theory but have no hands-on expertise. Pil focus on marketing and sales," Harrington said.

"We should be dealing on a global basis. Eighty-five percent of the population of this country has jobs with small-and medium-sized companies. We all have appliances, cars. Who are we manufacturing for Companies have to start getting visionary."

Looking for a home of your own just got a whole lot easier.

If you're in the market for a new home, HomeLine, our Open House directory, is the place to start.

This directory now gives you the full spectrum of home buying choices. You'll learn what homes are open and when so you can easily and quickly check out the "possibles" on your list. And now you can explore BUILDERS HOT LINE in case you want to add the option of newly constructed housing to your shopping list.

Just call 953-2020 from your touch tone telephone. You'll hear recorded instructions that are easy to follow for open house information and/or new home and condo construction information.

Buying a home is a major life event.
