W. Deven Mar, Southfold Contin, 27030
\$95. To register, call (313) 577-4605.

It's easy, it's powerful, it's Telenet Maryland. Choose item 13 "Search Titles by Type" and enter "White House." Then use "White House." Then use "White Houses" on second page of inted entires. A whole array of choices await you, including press releases. Voyager is a Lansing-based commercial on-line service that will let you try it out for an hour or so. Telnet open Voyager net and sign in as guest. One option is to select the Go Queettalk option for talk shows from 9-10 p.m. Sunday through Thursday. You may have your favorite Telnet access sites. E-mail them to me, and I will share with readers like you in a future column.

ing the telephone.

If you know the destination "addreas" for the destination alto, then use Telnet in the same way you would direct of the phone. If you need "directory assistance" to find a database, then the same way you would direct of the phone. If you need "directory assistance" to find a database, then the same way you would direct met decision that the phone of work way. The simple and direct method offered makes Telnet a popular tool among many internet users. Telnet can be used to gain access to a database, software, a bulletin board, or an on-

are, a bulletin board, or an on-In fact, the verb form "telnet" means to establish a connection to a remote computer connection to the Internet network. The noun "Telnet" is a VT100-type terminal emulation that connects to the remote computer.

To reach Telnet on O&E On-line, go to the main menu, type P

When you first connect to a re-mote site, scan the welcome screen, menus, and helps given. Write down any special com-mands you will want to use, such as how to cut that site. Generally you will exit the remote site and return to Telnet, but sometimes the departure command will take you out of Telnet entirely.

you out of Telnet entirely.

If you're at a remote site and
can't find exit instructions, first
try logoff and then close. As a
last resort, use abort. The abort
command may not properly hang
up, which will create a busy signal
at the remote site for an indefinite
period. That's why "abort"
