One in eight American women will develop breast cancer... If it's found early, about 90% of them will survive

The key to beating breast cancer is finding it before it spreads. While it's still 90% curable. With the best chance of saving the breast.

At Providence, we're committed to providing a quality program to screen for breast cancer and teach women about breast examinations using:

- low-dose radiation
- fully accredited mammography equipment
- specially trained radiologists and technologists
- four locations with convenient hours
- acceptance of most insurance plans

Providence provides all the care you need if the diagnosis is breast cancer, from surgery, radiation and chemotherapy to reconstructive surgery. A multidisciplinary working group of physicians and other health care professionals assists patients in deciding which treatment is best for them, then streamlines that treatment so care can begin in a matter of days rather than weeks.

Providence oncologists have access to the latest cancer-fighting drugs and treatment protocols through membership in several national research organizations. The Hospital's radiation oncology program is affiliated with University of Michigan, bringing state-of-the-art care right here for Providence patients.

And we offer something more: The support, care and compassion cancer patients and their families need at a time that challenges body, mind and spirit.

Please call one of our four locations to begin your breast care program today. And practice it for life.
