by Herbert M. Gardner, D.D.S. & Martha P. Zinderman, R.N., D.D.S.

**RAISE A GLASS TO HEALTHY TEETH**  
It would be hard to imagine a more cost effective way to preserve the good health of your teeth. Fluoridation is both an inexpensive and reliable way to improve the dental health of children and adults of all ages. For an average cost of fifty cents per person per year to fluoridate the water supply, that person realizes about forty dollars in savings on dental care costs. It only the return on all our investments were this good! Unfortunately, the benefits of fluoridated water are not available to everyone. About one-third of U.S. communities have yet to add fluoride to their water supplies. Those who live in these communities are advised to ask their dentists about getting their fluoride in other ways. According to the American Dental Association, these people would benefit from professional fluoride treatments every six months if they have had a cavity within the past three years.

**LIVONIA VILLAGE DENTAL**  
19171 MERIDIAN • LIVONIA  
(810) 478-2110

P.S. Those who do not live in areas with fluoridated water would benefit from a daily fluoride rinse at home regardless of their cavity risk.
