Remember Father's Day! June 16th

# Silverdome is the smart park place

BY MARTY BUDNER  
STAFF WRITER

It figures to be one of the biggest majors ever.

More than 100,000 people are expected to cram the spacious Oakland Hills Country Club grounds during practice and championship rounds of the 96th U.S. Open scheduled for June 10-16.

A whopping 3,000 volunteers more than any other U.S. Open are slated to work the seven-day event. Add a world-wide media contingent, corporate sponsors and their guests, plus numerous other officials and your talking a lot of people.

Consequently, parking provided a major concern for tournament officials.

Spectators were allowed to park on the North Course for past majors at Oakland Hills.

Not so this year. All spectator parking will be at the Pontiac Silverdome. No exceptions.

"The event is so much bigger than it's ever been so parking was a major concern for us," said United States Golf Association on-site official Steve Worthy.

"Both parking and shuttle service

are included in the ticket price so it's (parking) really free. We want it to run as smoothly as possible. I think we will run real well at non-rush hour, but it gets a little congested during rush hour along Telegraph.

"Our goal is to move (spectators) swiftly and efficiently from the Silverdome to here and back," he said.

The Pontiac Silverdome is 9.8 miles from the Oakland Hills South Course which is located on the southeast corner of Telegraph and Maple roads in Bloomfield Township. Constant shuttle service is planned between the sites and spectators conveniently will be dropped off at the Oakland Hills Country Club's entrance gates.

Tournament officials have a plan to help relieve the shuttle service flow during rush hour.

"On Thursday and Friday we hope to keep some of the better golfers out on the course a little later to keep the spectators there a little longer," said Worthy.

"We hope people will cooperate. If we can get the cooperation of the people from around this area to use that remote site it will really help," he said. "It will work smoothly if people give the Silverdome a reasonable shot."
