The front of the new office building of the Fred M. Warner Cheese company has been completed by filling in, building a cement platform and a cross walk. The building is a very complete business place and a fine addition to the street.

Some objection was made to the building of a cement walk across the park this week because the white walk would not harmonize well with the surroundings and a cinder path was suggested as a plan. However the walk is being built and now the Enterprise gives out as a hint that it might be painted green to match the grass and the trees.

Last week Thursday at the residence of the bride's sister, Mrs. John Landerman, of Birmingham, the marriage of Miss Bertha E. Lockwood to Mr. Darwin L. Burrows took place. Evening topic, "Modern Society and Health Problems," being the second ten-minute talk in the evening series on "Modern Problems." We are going to try and make these summer Sunday services interesting and short. We are to have good music. You are welcome.

Gildemeisters Return Home

On Monday Mr. and Mrs. Louis Gildemeister and their daughter, Hertha, reached Farmington on their return from a two months' sojourn in the old country. Mr. and Mrs. Gildemeister left Germany 30 years ago for the new country and this is the first return to the old home. They have prospered in this "land of the free" and while enjoying a visit with relatives in the Fatherland they still prefer their home in this country. They enjoyed the ocean trip very much as they also did their stay in Germany, where they noted many changes that had taken place in their 30 years' absence. Their daughter, Miss Emma, stopped at Newark, N. J., on his way home for a visit with friends.

Owen House Has a Deep Well

Landlord Grace of the Owen House, is certainly to be congratulated upon having secured a well that supplies him with an abundance of pure, cold, clear water of most excellent quality.

Although he had to go 132 feet to get it he finds that it is worth the trouble and expense. After going through hard-pan he struck a strata of gravel which furnished the necessary water.

Being completely separated by many feet of hard-pan he is absolutely safe from surface water and has a well that is absolutely sanitary in every respect.

Mr. S. Wells, the contractor who bored the well, is an expert in the business and he generally gets what he goes after. In this case he should feel quite well satisfied over his efforts.

Mr. Grace had planned that his windmill would be sufficient to do the pumping, but has given up that plan and ordered a gasoline engine for the purpose.

Make Good at Athletics

Holly, having taken upon themselves the title of champions of the Western High School League, faced Rochester, champions of Eastern League, in Holly last Saturday. The game proved a victory for Holly; score 5 to 1.

At the same time and place the field meet for the the county of Oakland high school was held. Farmington was represented on the track by Reed Webster, track team captain, and Edwin Gildemeister. Prof. Goodrich went along with the boys. They did well for Farmington. Gildemeister gaining 16 points and Webster 15. Gildemeister took second place in 15-yard dash, second place in 100-yard dash, first place in running broad jump and second place in high jump. Webster took first place in putting the shot, third place in 100-yard dash, 2nd place in 250-yard dash, third in running high jump and 2nd in running broad jump.

The boys deserve great credit for so pluckily holding up the purple and gold for F. H. S.

Detroiters Were Here.

Farmington business men enjoyed a very pleasant visit yesterday with the train load of Detroit's leading business men and manufacturers who stopped in the village for an hour while on one of their regular weekly trips to the suburban towns. They left the special cars in which they traveled at the eastern end of town and walked up the business street, making new and renewing old acquaintances with the local business men. They were royally treated and conducted to the park where they were regaled with light refreshments and where they were warmly welcomed by Mayor McGee and ex-Governor Warner. Mayor Thompson, of Detroit and Mr. Cornet responded in a very felicitous manner and the hour of their stay was an enjoyable one for all concerned.

Canning Company Organized

The new canning factory is now an assured fact as the company was fully organized Tuesday night.

A board of directors consisting of Messrs. Fred M. Warner, Amos Otis, Riley Wolfrom, Henry Salow, T. H. McGee and R. G. Adams was chosen and the board selected R. G. Adams for president and T. H. McGee secretary and treasurer. Work on the building will be started at once and as the machinery is already here there will be no delay. It is expected that tomatoes will be the principal product of the factory this year and that other things will be added afterwards. The building will be located on the side track at the north end of Mr. Otis' lots.

Farmers who desire to raise tomatoes for the factory should see the officials at once.
