

WORLD STONE & TILE'S NATURAL STONE & SILESTONE SELECTION

Operating on the values of extreme quality and superb customer service leaves World Stone & Tile no choice but to have one of the largest selections of natural stone & silestone products in Oakland County. Whether it be granite, marble, limestone, slate, or silestone, World Stone & Tile is confident you will find and fulfill all your needs.

Sizes ranging from 12" x 12", 16" x 16", 18" x 18", 1/4" slabs, or 1/4" slabs are available in most of our natural stone or silestone products.

Counter tops, tables, fireplaces, columns, and furniture can be designed and produced quickly and professionally out of Granite, Marble or Silestone. Special edge treatments for tables are readily available, either by using brass stripping, or any of our six different custom natural stone and silestone edges.

Contemporary or traditional, every consumer, architect, designer, or contractor should be able to fulfill any of their designer or creative ideas with the selection of Natural Stone and Silestone Products at World Stone & Tile.

WORLD STONE & TILE'S CERAMIC TILE SELECTION

Imported mainly from Italy, World Stone & Tile takes great pride in the quality and selection of the ceramic tile available and on display in their retail division. Ranging in sizes from 3" x 3" up to 18" x 18" for floors and walls, along with decorative and feature strips, there are over 100 different styles to choose.

When choosing ceramic tile either for counter tops, bathrooms, kitchen floors, backsplashes, it is very important to ensure you are receiving the proper quality tile. Most floor tiles will have a P.E.I. rating representing the strength of the tile. A rating of "5" usually allows the tile to be used in any high traffic commercial area and is superb for any residential application. A rating of "4" usually allows the tile to be used in any low traffic commercial area and is also excellent for residential application. A rating of "3" tends to be used mainly in residential areas and usually comes in either glazed or textured surfaces. Ratings of "2 and under" World Stone & Tile usually would not recommend.

Porcelain tile is also available with the advantages of being frost free. With the newer designer patterns, most consumers are using porcelain on front porches, fireplaces, garages, back patios, along with foyers, kitchens, and bathrooms. Porcelain is the same color all the way throughout the tile and adds a beautiful touch to that dream home.

Congratulations World Stone & Tile on your Grand Opening!
