## Be prepared for special moments

MONTE NAGLER

In most of my columns, I've stressed the importance of planning your photographs - studying the composition, determining the depth-of-field, expressing a single idea - in short, thinking it out in advance.

Oftentimes, however, a picture just happens. And if you and your camera are ready, you can capture the moment on film.

How often have you been caught without your camera when a rainbow suddenly arched across the sky or a setting sun cast vibrant colors? Or perhaps your youngster looked at you with that unforgettable expression and your cam-

era was out of reach.

Many well-known photographs, even Pulitzer Prize winners, were obtained only because someone was prepared and there at the right time with a loaded camera.

Be prepared and those exciting moments won't escape your lens.

You may never know when that special picture will come up, so begin by disciplining yourself to have a camera with you at all times. Make sure it's loaded with film and that the ASA dial is properly set.

A newsworthy event or beautiful scene may be just around the next corner. And if you're shooting a sports activity, have the exposure set and pre-focus on the area where you think the action will occur.

See Nagler, page D15
