

EATS WHAT HE LIKES AFTER TAKING FREE SAMPLE

It will be welcome news to dyspeptics to learn of a remedy that, in the opinion of thousands, is an absolute cure for indigestion and all forms of stomach trouble, and, better still, it is guaranteed to do so. The remedy is Dr. Caldwell's Syrup Pepsin.

We all know the value of pure pepsin in indigestion, and add to this some exceptional laxative ingredients and you have a truly wonderful remedy. Mr. T. W. Worthy of Fordyce, Ga., got to the point where he could not even eat or digest vegetables after many years of seeking he found the cure in Dr. Caldwell's Syrup Pepsin. Mr. Rudy Karch of Moline, Ill., was in the same predicament with his stomach, took Syrup Pepsin and is now cured.

Hundreds of others would gladly testify.

It is a guaranteed cure for indigestion, constipation, biliousness, heartburn, gas on the stomach and similar complaints. A bottle can be had at any drug store for fifty cents or a dollar, but if you wish to make a test of it first, send your address to Dr. Caldwell and he will supply a free sample bottle, sent direct to your address. You will soon admit that you have found something to replace salts, cathartics, breath perfumes and other remedies of former years. Syrup Pepsin will cure you permanently.

For the free sample address Dr. W. B. Caldwell, 402 Caldwell building, Monticello, Ill.

On last Monday the canning factory started up and it has been working on tomatoes this week. It is hoped that the little industry will be a success and that it will grow to much larger proportions.

A celebration that puts the usual kind completely in the shade was the one held at the pleasant home of Mr. and Mrs. C. B. Andrews last week. It was an annual family reunion and we understand that it lasted for several days and that those present numbered nearly one hundred. They came from all over the state.

A. M. Bosworth is still making improvements on the Redford four mills and the latest is an elevator that has just been commenced. It is a circular one made by the Imperishable Silo company of Huntington, Ind., and will be a modern affair in every respect. This will greatly facilitate the handling of the grain and is another evidence of the popularity of the products of this mill which makes these improvements possible.

COUP OF GREAT COLLECTOR

How Charles Wertheimer Bought Furnished House in Order to Get Priceless Chinese Vase.

The late Charles Wertheimer when asked on one occasion what he considered to be his astute business coup, thought for a while and then told how once when he was walking through a Brighton square he espied through an open window what he knew to be a priceless Chinese vase. He went to the nearest postoffice, examined a local directory, found the name of the resident. Then he called and asked for the gentleman and was shown into the study under the name of "Hamilton." He briefly explained that he was looking for a modest house in Brighton and had taken a fancy to this one. Would the gentleman entertain an offer for the place as it stood—"lock, stock and barrel?" The owner, a little nonplussed, hesitated. "If your offer is reasonable," interrupted "Hamilton," "I will give you an extra thousand." "Call tomorrow at 10:30 then," replied the owner. "Hamilton" did and found him prepared to accept \$18,000 for the twenty-two years' unexpired term and the contents of the residence.

Although this was well over market value, "Hamilton" at once closed, the extra thousand, according to promise. As, however, he afterward sold the vase for \$35,000, his coup was unmistakable.

GOOD ONE ON BERNARD SHAW

Cincinnati Librarian Says They Had "All the Works of the Great Buffoon."

"Bernard Shaw's new biography—a biography written by an American—is a piece of work that will win this brilliant playwright the respect he deserves."

The speaker, a Cincinnati poet, smiled.

"Mr. Bernard Shaw is well known," he said, "but not well respected. His profound and serious mind is regarded—few know why—as the mind of a trifle."

SAWDUST IN CONCRETE.

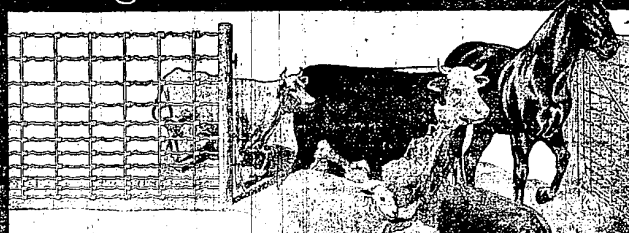

Experiment has shown that a mixture of two parts sand, one part cement, and three-quarters of one part of sawdust, will furnish a concrete into which nails may be driven, and which will hold them almost as well as wood itself. This will make a capital flooring, or paving, and is probably one of those simple inventions which have revolutionary effects upon trades. We have not heard of any bad effects from cracks due to shrinkage of the woody contents, and presume this has but a negligible result.

Speaking on Maxims.

The speaker, with an ill-concealed sneer, handed this maxim to the savor: "Some people are so starchy that they are dishonest."

"And by the same token," responded the savor, with a rare laugh, "some people are so liberal that they are dishonest. Count them up, please, and see, in these days of liberal spending, which side has the majority."—Judge.

Through the Gate or Not at All

AMERICAN FENCE

Good Fences are a farm investment that bring the most returns for the least money

ARE you losing money? If you had a hole in your pocket, out of which you were losing hard-earned dollars, would you sew it up? The time has arrived when a fence around the farm is as much a necessity as a cultivator.

If you are feeding 60c or 70c corn to hogs in a dry lot, allowing good, green feed to go to waste on other portions of your farm, you have a hole in your pocket, out of which you are losing good, hard-earned dollars. Sew it up.

Look up an American Fence dealer and let him show you how a few dollars invested in fence will yield a big big rate of interest on feed saved. It is made of a quality of wire drawn expressly for woven-wire-fence purposes. Adjusted by latest improved process—the best that the skill and experience of years has taught. Built on the elastic, hinged-joint (patented) principle, which effectively protects the stay or upright wires from breaking under hard usage.

The real test of a fence is the service you get out of it. Test, judge and compare American Fence under any and all conditions, and you will find that the steel, the structure and the galvanizing are equal in durability, strength and efficiency to the hardest usage.
