

**A REMARKABLE CURE FOR DYSPEPSIA**

Munyon's Stomach Treatment Performing Miracles.

MUNYON TELLS YOU HOW TO GET WELL. FREE OF CHARGE

"A few days ago I received a letter from a young man, who states he is 32 years of age, and has occupied several hospitals for dyspepsia, but without benefit and inability to sleep has been unable to concentrate and has consequently been discharged on the ground of neglect of duty. He goes on to say that he is a young man of steady habits, but for years he has suffered from dyspepsia, which has affected his nerves that he is unable to sleep and that it is not correct upon his part, nor lack of interest in the business, but simply physical weakness. To make my advice in this matter.

"See the benefit of a large number of these similarly situated I propose to answer this letter publicly. It may be the best advice helping many who may be affected in this way.

"In the first place the stomach must be made well before the nerves can be made strong. The nerves must be made strong before one can sleep well. It is not a capable of doing his best who is in any way troubled with insomnia or any form of nervousness. The greatest general have been seen of iron nerve and indigestible will. Therefore, the first and directing being able to eat well, and digest all they ate.

"It is said that Napoleon lost the battle of Waterloo because of a fit of indigestion. Grant's enormous reserve power was due to a well stomach. Abraham Lincoln said that it is not correct upon his part to have a stomach. Grover Cleveland, it is said, never went to bed until he had a hearty meal at 2 or 3 o'clock in the morning, and he slept soundly until 11 o'clock and got up refreshed, ready for a new day's work.

"Free will is another type of healthy minded. Who thinks for a moment that he would be the President of the United States today had he been a dyspeptic or affected with some nervous ailment? I claim that two-thirds of all failures in professions and business are due to weak and deranged stomachs.

"No business house would care to employ a dyspeptic representative to sell goods for them on the road. One might as well employ a man who is blind to sell a week, who never gets beyond his store, and who is often affected with physical weakness. They lack the nerve power and commanding strength that come from a good, sound stomach.

"No one cares to hear a dyspeptic preacher. No matter how plain he may be, he is bound to reflect the silliness and stupidity of his hearers with his melancholy feelings.

"I would think of entrusting an important legal case in the hands of a dyspeptic lawyer, any more than I would care to entrust my own life, or that of my dear one, in the hands of a physician who is nervous, feeble or dyspeptic. Men must have good digestion, and a healthy nervous system, before they can render a clear, clear-cut decision either in medicine, law or business.

"I believe that more than half of the dyspepsia cases are traced to ill health, and want every dyspeptic to try my stomach treatment. For it corrects nervousness, makes the stomach almost as healthy as the rest of the system, and restores the best out of it makes for rich, red blood, and in turn, strength, and the nerve builds up the general vitality, and makes it a pleasure to live and do things that are pleasant.

"Professor Munyon makes no charge for consultation or medical advice, but a fee is paid. Address Prof. J. M. Munyon, Munyon Laboratories, 175 Third and Jefferson Streets, Philadelphia, Pa.

**Lesson in Good Manners.**

When the "Boy Scouts" movement was at its height, three of the youngsters journeyed from Baltimore to Washington to be introduced to the president. When Mr. Taft shook hands with them, one of the little fellows stuck out his left hand.

"Why do you give me your left hand?" asked the president.

"That's the way us Boy Scouts shake hands," said the boy, with pride.

"Well," commented Mr. Taft dryly, "the sooner us Boy Scouts learn better the nicer us Boy Scouts will be."—The Twelve-Month Popular Magazine.

**Exits From Every Room.**

A school building in which every room has a direct connection with the ground, without first entering the main hall, has been built just beside the site of the famous Collinwood (O.) school in which 175 children perished by fire in 1908. It represents many unique features of construction and is said to be as fireproof and panic-proof as it is possible for a school to be.—Popular Mechanics.

When we look back now upon some of the things we used to worry about, we wonder what the lunacy commissions were doing all that time!

When we get down we wonder how it happened, but when we win we accept it as perfectly natural!

**Don't Persecute Your Bowels**

Get out cathartics and purgatives. They are harmful, unwholesome, and unnecessary.

Small Pills, Small Dose, Small Price. Genuine must bear Signature.

**FOR EYE AGES Pemits Eye Salve**

**REMEMBER PISO'S FOR COUGHS & COLDS**

**Methods of Calf Raising**

By H. W. NORTON, Michigan Experiment Station

Calves Being Raised for Breeding Stock Should Be Kept Healthy and Growing, Not Fat.

The calf may be allowed to suck dam a few times or for the first day or so, but should then be put in a separate pen. If the calf is strong and the cow's udder is in good condition, it is best to separate them the first or second day. If the calf is weak, it is better to leave it with the cow, as it will feed often and grow stronger, or if the cow's udder is in poor condition, it is best to separate them at once. In any case the calf should be given the first milk or colostrum, as it has a stimulating and corrective effect upon the system. The first few days it is best to feed the calf three times a day, though it is not absolutely necessary. The milk should be fed in a clean pail, directly after milking, while still at body temperature. For an average sized calf, weighing 70 to 75 pounds, at birth, 8 to 10 pounds a day, divided equally between the feeding periods, is sufficient to begin with. The amount fed should be increased gradually, and great care taken to avoid over-feeding. At the end of two weeks the calf may be given 12 to 16 pounds daily, divided equally between the three feedings. In case of acute disease, the feed should be reduced immediately, cutting down at least one-half, and, if necessary, medical treatment resorted to.

The time for beginning the substitution of skim milk in the place of whole milk will vary, depending upon condition. Whole milk feeding is necessary, expensive, and should not be continued longer than necessary to produce good results. When feeding for dairy calves to be kept and grown on the farm, the skim-milk supply may be begun at two or three weeks of age, where it is desired to produce heavy calves at an early age. It is better to feed whole milk up to four or five weeks before starting the substitution. The change should be made gradually so that the calf's stomach may adjust itself to the different conditions without trouble. Begin by adding an equal amount of skim-milk at each feed the first day, and replace two pounds the second day, and so on. The amount of skimmed milk may be increased to 29

**CURRENT AND GOOSEBERRY**

By O. J. GREGG, Assistant Horticulturist Michigan Agricultural College

The currant and gooseberry, commonly known as grossels, are among the important small fruits to be grown on every farm or small fruit garden. Their care is simple and for this reason are not given as careful attention as they really should have in order to get good results. For a farmer's fruit garden one dozen plants of each are generally sufficient, as they are but little used fresh, their principal use being for preserves and jelly.

They are rather easily propagated. The young shoots one foot in length if planted deep in a nursery row in the fall, so that the tips are above the soil, will take a large proportion will take root the following season and can be permanently planted the second spring. They should be planted 4 to 6 feet, and better 8 to 10 feet apart. They should be kept cultivated throughout the summer similarly to raspberries. They thrive in a cool, rather damp soil, and a heavy soil is much better than a light one. The currants like to grow in the cranberries the grossels have small fruit spurs on old wood which produce fruit year after year. They also bear fruit on the previous season's growth, but the latter buds. On this account the pruning of the grossels is entirely different from that of the other small fruits. But little pruning is necessary the first few years. After four years of growth, however, they should be pruned regularly every year. In pruning all branches over four years of age should be removed, as these become too old to form good large fruit. At the same time all branches lying on the ground, those attacked by borers, broken or interlacing branches should be removed. They are generally pruned near shoots that spring from the roots each year. These should be removed, except

three or four of the best and strongest ones left distributed about the bush to take the place of some old branch that is to be taken out soon. An ideal currant or gooseberry bush should be therefore symmetrical, made up of two or three shoots four years old, the same number of three-year-old branches and possibly more as the number that might be broken on or diseased. If properly taken care of, cultivated, pruned and supplied with a much of manure each year, a pure crop will result. There are several varieties, but among currants the London Market is a very prolific, hardy and desirable variety and almost as large as the cherry currants, as Faja Prolifera, is as desirable as any variety.

Among the gooseberries the Downing takes the lead, being planted more extensively in Michigan than all other varieties put together.

**Flock Should Be Well Fed in Fall.**

The success of the lamb crop in the spring depends a great deal upon the health of the flock during the breeding season and upon the condition in which they go into the winter feeding pens. Good condition can be assured by furnishing some succulent pasture, such as rape, during the season when pastures are dry and bare.

This has been done in some places by seeding rape in the oats at such a time that it will produce forage in the oat stubble after harvest.

Select Seed Corn Before Cutting.

The best time to select seed corn is while the corn is still standing in the field. At that time not only the ear but the stalk can be seen and the maturity and character of the whole plant can be judged. A liberal quantity of ears should be selected to allow for those which will be discarded by the germination test in the spring.

**Summer Woodpeckers.**

The summer woodpecker ought to be growing fast these days, or will let mother and the girls rattle for the very wood next summer!

Wing Uncle Joshua... "Be you the elevator conductor?" asked Uncle Joshua, who had strayed into town out of the sweet rusticity of a comic paper.

"Yes, sir," grinned the boy.

"Well, I come ter this village ter see the high bulidin'. Know high up d' ye go?"

"To the top—twenty-fourth floor."

"Take me up to th' fourteenth. Sho! What's th' use o' risin' my life an' goin' all the hull way when the folks to home 'n' never beleave I went any higher than ten stories, no matter what I tell 'em?"

"EGZEMA ITCHED SO BADLY I COULDN'T STAND IT."

"I suffered with eczema on my neck for about six months, beginning by little pimples breaking out. I kept scratching till the blood came. It kept getting worse, I couldn't sleep nights any more. I kept looking for about a month, then I went to a doctor and got some liquid to take. It seemed as if I was going to get better. The itching stopped for about three days, but when it started again, was even more than before. For eczema itched so badly I couldn't stand it any more."

"I went to a doctor and he gave me some medicine, but it didn't do any good. We have been buying Cuticura Remedy in the house, so I decided to try them. I had been using Cuticura Soap, so I got me a box of Cuticura Ointment, and washed off the affected part with Cuticura Soap three times a day, and then put the Cuticura Ointment on. The first day I put it on, it relieved me of itching so I could sleep all that night. It took about a week, then I could see the scab coming, and kept the treatment up for three weeks, and my eczema was cured."

"My brother got his face burned with gun-powder, and he used Cuticura Soap and Ointment. That was my thought, he would have scars, but you can't see that he ever had his face burned. It was simply awful to look at before the Cuticura Remedies (Soap and Ointment) cured it." (Signed) Miss Elizabeth Gehrl, Forest City, Ark., Oct. 16, 1910. Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a sample of each, with 32-page book, will be mailed on application to "Cuticura," Dept. 7, L. Boston.

**HEALTH AS AN INVESTMENT**

Fraternals, Labor Unions and Insurance Companies Erect Tuberculosis Sanatoria.

As an investment in the health of their members, four large fraternal organizations have established a station and one of the largest insurance companies in the United States have established sanatoria for the treatment of tuberculosis, according to a statement issued by the National Association for the Study and Prevention of Tuberculosis. The Royal League, the first fraternal order to establish a sanatorium, conducts a hospital for tubercular members at Black Mountain. The Modern Woodmen of America conduct one at Colorado Springs; the Workmen's Circle, one at Liberty, N. Y.; and the independent Order of Foresters have one at Rainbow Lake, N. Y., and will soon open a second one at San Francisco, Cal. The International Typographical union has since 1898 conducted a sanatorium at Colorado Springs, and the International Printing Pressmen and Assistants' Union of America has recently opened a new institution at Rogersville, Tenn. A leading life insurance company is now erecting a sanatorium at Mt. McGregor, N. Y., which will be the first of its kind established by an "old line" insurance company.

The Simple Life.

Anna Marie Wilhelmina Pickering, in her "Memoirs," edited by her son, tells a Yorkshire incident which contains a great deal of human nature. Variety spiced life; the plain is monotonous, until its extent entitles it to name of prairie or desert, and it gains interest through vastness.

There was an old couple in the village whom I used often to go to see. One day, when I found them sitting, one on each side of the fire, the old man said to me:

"We 're 't missin' and me, we 're been married high on 50 years, and we've never had one quarrel."

The old woman looked at me, with a twinkle in her eye, and said:

"It 's not we 're contentious, but varrie doot!"—Youth's Companion.

The Moderation of Jack.

Jack justified himself to his wife. "I only used the nail on my husband," he cried. "I didn't go around with a hairpin spliking Tom, Dick and Harry."

Inflammatory Rheumatism may make you a cripple for life. Don't wait for inflammation to set in. When the first slight pain appears, try the poison out with Hamlin's Wizard Oil.

There is a certain amount of lye in soap, but that is no reason why it should be injected into the advertisement.

No matter how hard the rules may be, they're as fair for us as for the rest of the gang!

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays the pain, cures wind colic, 25c a bottle.

**PUTNAM FADELESS DYES**

Color more goods brighter and faster colors than any other dye. One lot package colors all there. They dye in cold water better than any other dye. You can dye any garment without tipping apart. Write for free booklet—How to Dye, Bleach and Mix Colors. PUTNAM DYE COMPANY, Quincy, Ill.

Mr. Kidder—Every one speaks of Miss Antique as being a bargain. Miss Cautique—Well, her age is considerably marked down.

Lawn Economics.

"I noth," says the sage, "that you allow a sprinkler to spray water upon your lawn almost continuously."

"Yes," said the naïve. "We do that to make the grass grow."

"But the other day I saw a man pushing a clicker contrivance over the lawn and—"

"Oh, yes; that was a lawn mower?"

"And what is its purpose?"

"Why, it cuts the grass."

"Then why do you put water on it to make it grow if you simply cut it down as fast as it comes up?"—Judge.

Easy Deduction.

Watson—Who is giving the party in the neighborhood?

Sherlock—Very simple. Watson. Who but the family that is dead broke and owing everybody?

Too Late.

"Hubby, I found a lock of hair among your old papers. I never gave it to you."

"You needn't worry. I don't remember who did."

**900 DROPS CASTORIA**

ALCOHOL—3 PER CENT. A Vegetable Preparation for Assimilating the Food and Regulating the Stomach and Bowels of INFANTS & CHILDREN.

Promotes Digestion, Cheerfulness and Rest. Contains neither Opium, Morphine nor Mineral NARCOTIC.

Prepared by J. C. FLETCHER, Proprietor, Lowell, Mass.

Perfect Remedy for Constipation, Sour Stomach, Diarrhoea, Worms, Convulsions, Feverishness and LOSS OF SLEEP.

THE CENTAUR COMPANY, NEW YORK.

16 months old 35 DROPS 15 CENTS

Exact Copy of Wrapper.

**W. L. DOUGLAS**

\$2.50, \$3.00, \$3.50 & \$4.00 SHOES

WOMEN wear W.L. Douglas stylish, perfect fitting, easy walking shoes that give long wear, same as W.L. Douglas Men's shoes.

THE STANDARD OF QUALITY FOR OVER 30 YEARS

The workmanship which has made W.L. Douglas shoes famous the world over is maintained in every pair.

If I could take you into my large factories at Brockton, Mass., and show you how carefully W.L. Douglas shoes are made, you would then understand why they are warranted to hold their shape, fit better and wear longer than any other make for the price.

CAUTION: The genuine have W. L. Douglas name and price stamped on bottom. If you cannot find W. L. Douglas shoes in your town, write for catalog. Shoes sent direct from factory. We wear all styles prepared. W. L. DOUGLAS, 145 Spark St., W. Brockton, Mass.

DO NOT FAIL to buy my DRESS SHOE, \$3.50 or DRESS SHOE, \$3.00. DRESS SHOE will outlast any other shoe.

To Get Its Beneficial Effects, Always Buy the Genuine, SYRUP of FIGS and ELIXIR of SENNA manufactured by the CALIFORNIA FIG SYRUP CO.

Sold by all leading Druggists. One Size Only, 50¢ a Bottle.

DR. J. D. KELLOGG'S ASTHMA

Remedy for the prompt relief of Asthma and Hay Fever. Ask your druggist for it. Write for FREE SAMPLE, NORTHROP & LYMAN CO. LEE, BUFFALO, N.Y.

Readers: If this paper describing it's buy anything advertised in its columns should inform upon having what they ask for, refusing all orders of imitation.

W. N. U., DETROIT, NO. 40-1911.
