# Only a handful

# of chefs are truly 'Masters'

truly INASIERS

to the ever 2 million
chefecoles in the enormous
food industry, fewer than 80
belong to the prestigious fratternity
called Master Chef.
The governing by of the culinary
profession is the American Culinary
Federation. There is criteria for different levels in our profession ranging
from Certified Cook, Working Chef.
Executive Chef, all the way to Master
Chef. Certified Massier Chef examinations are held every year, or es, and
cost somewhere in the neighborhood of
\$5,000. It encompasses 10 days of teating. I wouldn't say the only great chefs
in the United States are the 80 or so
Master Chefs on file. There are many
chefs who for their own reasonad no not
subscribe to American Culinary Federation criteria, and don't feel it a necessary goal in their professional life. But
I'll tell you, I have the good fortune to
know the Michigan Master Chefs, and
let me tell you, these guys can cook!

Jeff Gabriel,

### Jeff Gabriel, Certified Master Chef

Certified Master Chef
Jeff is a full-time instructor at
Schoolcraft College in Livonia, and the
chef owner of the Farm Restaurant in
Port Austin. At the Farm, he and his
wife, Pam, cook up some amazing,
wholesome, homestyle dishers, such as
chicken and dumplings. Jeff and Pam
live in Port Austin with their son,
Michael.
When asked what was his favorite

Michaol.
When asked what was his favorito meal to prepare, Joff's response was "We like to keep things simple and we'ro very health conscious. I like to make one pot dishes, especially soups made with beautiful fresh stocks or miso with vegetables, and on occasion, meat with a crusty loaf of the special Farm baked bread, and we're happy folks."

Dan Hugelier,
Certified Master Chef
Dan is recognized as well as respected locally and internationally for his
accomplishments in the culinary profession. He seems to be a master of all
including ice carving, cooking, consulting and a student of everything. Dan
has alse chosen after many years of
running frantic in the restaurant
world, to settle into the quiet community of Fenton where he lives with his
wife, Katie, and son, Eric, 6. Dan said
wife, Katie, and son, Eric, 5. Dan said
wild Michigan morels and asparagus.
As Dan enjoys hunting, his favorite
meal to make is game of any kind.

Joe Decker.

### Joe Decker, Certified Master Pastry Chef

Schoolcraft College is lucky to have Joe in their lineup. I choose the term lineup as Joe is a hugo athlete who enjoys running, swimming and baseball.

bed!

The lives in Howell with his wife,
Cathy, and their three sons, Anron,
Ryan and Korin, Awards from Joe's
culinary competitions sit right next to
his son's trophics. One is just a sit
important as the other. Joe enjoys
breaking away from pastry making at
home to make sushi.

### Leopold Schaeli, Certified Master chef

Lerotified Master chef
Leopold's roots are in Switzerland
where he started working in the
hotel/bakery by his home. He is best
known for his long-standing position
at the Machus Red Fox. He currently
teaches international cooking at
Schoolcraft Collego, and lives in
Bloomfield with his wife Margrit. At
home he enjoys preparing her favorite
– Muesili.

### Mike Russel,

Certified Master Chef Mike likes in Rochester with his wife and daughter. He recently opened

## Balancing your diet reduces

PEGGY MARTINELLI-EVERTS SPECIAL WRITER

PEGGY MARTINELL-EVERIS

It has been aid that once you've been diagnosed and treated for cancer that you never know whether you've had cancer or you have cancer.
Either way, cancer is frightening. It is the second leading cause of death in the United States. There is no clear scientific evidence that diet can cure cancer, but there is overwhelming agreement that a nutritionally balanced diet can greatly reduce your risk of developing cortain forms of cancer and can improve your overall health if you do have cancer.

Diet is important because there is research to show that certain components in the diet can actually promots specific cancers. For example, a high intake of dietery fat, smoked, and cancer and can improve your overall actually promots goed or nitrate cantaining meats, and access calories, are potent

meats, and excess calories, are potent contributors to cancer and other chronic diseases.

chronic diseases.
Cancer is actually a group of diseases with multiple causes in which abnormal cells grow and spread. There are three major phases in can-

There are three major phases in cancer development.

First — an irreversible genetic alteration that takes place inside a cell. Then, if this cell is stimulated by a promoting agent for a long time, the cell will become malignant. Finally, the last and most lethal stage, occurs when tumor cells metastasize, that is, colonize and grow in sites in addition to the site of origin. Although cancer can occur anywhere in the body, the most com-

there is research to show that cortain components in the diet can actually promote specific cancers. For example, a high intake of distary fat, smoked, salt cured or nitrate containing meats, and excess calories, are potent contributors to cancer and other chronic diseases.

mon sites are the lungs, colon, rectum, skin, breast and prostate. Cancer research and recommendations focus on cancer prevention, risk reduction and early detection.

### Cancer prevention

Cancer prevention

Scientials believe that 8th person
of all cancers are associated with a
few lifestyle factors that we can control. These include dict, smoking,
and exposure to the sun. Other factors associated with cancer prevention are environmental pollutants
like automobile exhaust, charconl
barbecues and manufactured chemicals, raden, medicals x-rays, and occupational pollutants like asbestos and
vinyl chloride.

### Risk reduction

It's never too late to reduce cancer risk. Cancer does not occur due to a single event, but it is a process that may take decades to develop. Cancer risk rises with regular exposure to cancer-causing agents over many

# Early detection

Follow your doctor's advice regarding tests for cancer. In many cases the earlier cancer is found, the more likely the treatment will be effective. A healthy diet can make a big difference. Check out these cancer promoters and cancer protectors.

### Cancer promoters

Cancer promoters

# Fats: Fat has been studied more thoroughly and linked more frequently to cancer than any other factor in our diets. Too much fat, whether saturated or unsaturated, leads to a higher risk of colorectal, breast and prostate cancer. Fat is believed to be involved with both early abnormal cell changes and helping existing tumors to grow.

# Salt or nitrate-cure or smoked foods. People who eat these foods regularly, and in large amounts, appear to have an increased risk for cancer development. Occasional charconi grilling doesn't significantly increase cancer risk, however, you should avoid eating charred food. Also, let the mest juices drip away before out ing.

# Alcohol and tohners: Evensive

ing.

E Alcoholi and tobacco: Excessive amounts of alcoholic beverages have been linked to a number of cancers. People who smoke cigarettes and drink alcohol have a tremendously increased risk of mouth and esophageal cancer.

Cancer protectors

Siber: Fiber is the indigestible part of plant food. It seems to lower your risk of bowle cancer because it helps your body rid of food wastes quickly, which will reduce your exposure to cancer causing chemicals. Fiber may also help lower your risk of the rid increase, and is beneficial for dinbetes cantrol. Increase your fiber intake slowly to give your intestines time to adjust, and drink plenty of water to help the fiber "work" and move smoothly through the colon. If you cat an extremely high fiber diet, you lessen your body's absorption of minerals such as zinc, iron, magnesium and calcium. Fortunately, fiber rich foods (but not supplements) are rich in these minerals to help compensate for losses. Please see CANCER, B2

## Fabulous frittata delicious way to salute spring

One of my favorites for a quick lunch or dinner used to be an omelet with cheese, ham, or a deli meat like aslami or corned beef in addition to the eggs.

My omelets today are no less flavorful, but are substantially lat and cholesterol reduced. I still find them a tatty solution to a harried see the ingredients can

them a tasty solution to a harried schedule, because the ingredients can be kept available in the fridge and on the pantry shelf.

Omelets are main courses that are ready to eat before I can even think of what to "order in." Besides, they taste better than most ready prepared main courses. They also fill the bill for easy to prepare treats for a weekend brunch or lunch.

The ingredients have changed to meet my "Eating Younger" goals of lower cholesterol and fat. One whole egg and two whites still makes a pretty yellow omelet. You can save 212 milligrams of cholesterol, 5 grams of fat, 1.6 grams of saturated fat, and 40 calories by using egg whites instead of a whole egg. Try this substitution for scrambide eggs too.

If high cholesterol is one of your health concerns, you might use a combelled eggs too.

scramore eggs vor might use a commental egg substitute. But why bother when egg whites will serve that
same purpose at one fourth the price?
You can even color the egg white yellow by adding a pinch of turneric.
This herb gives mustard its yellow by the color and can be found at your local
bulk food store. You probably know
that two egg whites will stand-in for a
whole egg in a recipe.
The suggested using tomatoes,
onions and green peppers in my Tuna
Frittata recipe, but you can substitute
your favorites. It's important to partially cook and drain the vegetables so
that the omelet doesn't become
watery.

tially cook and drain the vegetables so that the omelet doean't become watery.

Lately, I have been trying a processed cheese made from tofu. With all the new studies pointing to isoflavones in soy to help prevent cancer, I've been looking for a source that I could regularly include in my diet. The cheese is low in fat (2 grams) and has no fat or cholesterol. It's perfect in this recipe.

I used tuna in the recipe because of its low calorie, high protein and Omega-3 fatty acid content. But you could substitute cooked chicken, some of the reduced fat turkey assunge or deli meats. The frittata has enough flavor so that it could also go solo as a vegetarian dish.

Muriel G. Wogner is a registered dictition and nutrition therapis with an office in Southfield. She publishes "Eating Younger," a quarterly newsleter filled with recipes and nutrition tips. To subscribe, send a check or money order of \$13.50 to Eating Younger, P.O. Box 88021, Pleasant Ridge, MI 48069...

TUNA FRITTATA
2 eggs and 4 egg whites
3 fresh plum tomatoes, silced and

seeded 1/4 cup onion, diced

1/2 red or green bell pepper, cut in strips 3 slices non-fat Cheddar cheese or tofu cheese

or tolu cheese

1 can (6 1/2 ounces) white albacore tuna, water-packed,
rinsed, drained and flaked

1 teaspoon caraway seeds 1/2 teaspoon dried thyme Gamish: Fresh parsley or chopped

1/2 teaspoon dired thyme
Gardish. Fresh parsley or chopped
green onlons
Place tomatoes, onlons and pepper
strips in microwave-safe dish. Cover.
Cook in microwave on high for 1-1/2
minutes. Drain liquid. Add thyme and
flaked tuna.
Spray a 9-inch skillet with non-stick
spray. In a bowl whisk together the
eggs and caraway seeds. Pour egg mixture into akillet, tilting and rotating
the skillet to spread the mixture evenly. Cook until set.
Spoon the vegetabloftuna mixture
onto the egg paneake. Top with cheese.
Cover skillet and heat on low for about
2 minutes, or until cheese melts. Cut;
into 4 serving pieces. Transfer to n
late, using a broad spatula.
Garnish with chopped green onions
or parzley. Serves 4.
