lion addition.
Over the next 18-months, the institute will reinstall its permanent exhibits and prepare space in the annex for a Tyrannosaurus Rex Skeleton, an expansive climate exhibit and an orientation theater where visitors will see an MTV-type overview of the newly designed institute.

institute.
"We're concerned with real science, but the amusement park feel is necessary," said Lawrence Hutchinson, curator of exhibits at Cranbrook Institute of Sci-

ence.
"We realize that we have to reach out and grab people," he said. "It's all about eliciting an 'ooh and ab."

#### Hybrid artform

While the sleek industrial design of internationally renown architect Steven Holl has certainly reinvigorated the musty air of the institute, the most striking contrast is the contem-porary aesthetic brought to the high-brow fields of physics, geol-

high-brow fields of physics, goology and biology.

Perhaps in another context—
at Cranbrook's Art Museum, for starters—the exhibits could be treated simply as modern art.
Don't bolieve it? Examine the 10-faot-long robot chameleen, turching with his long tongue extended.

extended.

As the definition of sculpture expands, the mechanical chameleon with a skin composed of a dozen video screens makes a compelling case for a hybrid artform of science, technology and

interactivity.
At a workstation across from At a workstation across from the robot, visitors can create the old-world lizard's environment background by selecting the pattern of color and spapes. In response, the video-skin chameleon exudes a camouflage to match the background. The eight exhibits in "Robot

Zoo" provide a hands-on experience for neophyte scientists while spoon-feeding the principles of physiology and physics, said Hutchinson.

said Hutchinson.
Adding to the hands-on drama is one of Crabrock's invention, the Bio Bar, which resembles a seen out of 'Star Trek.'
At the Bio Bar, attendant wait on those scated at the horse-shoe shaped table, serving quests with any of the entrees on the menu of small-scale experiments.

the menu of small-scale experiments.

An order of "Cricket Songs," for instance, comes with two sticks. By rubbing them together, the sound of a cricket can be intimated. An order of "Chameleon Eyes" - two small cylinders - provides a virtual experience of what it's like to gaze through lizard optics.

"Our goal is to build science literacy," said Hutchinson. "We want to show that you can have an imaginative, pleasant experi-

once with science."

### **Destination Cranbrook**

Destination Cranbrook
A few years ago, acknowledging that style does matter at a
scionce museum would have
inevitably drawn heavy criticism
from scientists and educators.
But a funny thing happened
along the way to arriving at the
proverbial hypothesis – the
world became an interactive pinball zome.

ball game. And science has become insep-

And seience has become inseparable from art.
Whether coincidence or timely planning, the Cranbrook educational community is "uniquely qualified" to bridge the words of methodical inquiry and self-expression, according to Elaine Gurian, acting director of the Cranbrook Institute of Science.
"It's what we call the 'Cranbrook Institute of Science." and Cranbrook Patchy," said Gurian, who noted there are only a few other educational communities in the country where the science and

art museums work together.
One of the best examples of
the Cranbrook Factor is the construction of an orientation the
ater where designers from the
Academy of Art worked with actentists at the institute.
The orientation theater,
according to Gurian, is a
metaphor for the collaborative
spirit at Cranbrook and the
interrelationship between art
and science.

"Things may seem disconnected, but the world is one ecologi-cal system," said Gurian.

The collaborative spirit isn't confined to the Bloomfield Hills

connect to the bloomhet connect compus.

In the next few weeks, the media campaign, "Destination Cranbrook," will hit the aways and newspapers. The intent is to position Cranbrook as a place to bring the family and spend the day, said Gurian. "You can't have a public museum and keep it a secret," she

said.
Gurian's can-do attitude has had an immense influence in building confidence in the renovation of the institute, especially after the sudden death last January of then-director Dan Appleman.

Beth El Chapel.

Beth El Chapel.

The festival runs through Saturday, June 20. It features local and international musicians performing the music of the masters, and several 20th-century composors, such as Ravel, Debusay, Prokofiev along with Tower's recent works.

The concerts are held in intimate and ethereal settings such as the chapels of St. Hugo's, Temple Beth El and Kirk in the Hilla and Grasse Pointe Memorial Church.

Taking the abstract dissonance of serialism established by Schoenberg in the early 20th century and adding the unbridled passion of Beethoven, Tower has derived a complex, yet accessible sound.

Tower has derived a complex, yet accessible sound. Her style can be summed up as "every sound relates to the whole." Or what Tower refers to as motivated structures. "I'm trying to learn how to make a piece move while creating an overall strong musical structure," she said. Recently, the Pittsburgh Symphony Orchestra featured her compositions, many of which are distinguished by an infusion of necroussion.

percussion.
The percussive sound is an

unmistakable influence. Tower grew up in South America and was stirred by both the indige-nous rhythms and the works of the masters, particularly Rosthwen

the masters, particularly Beethoven. While she claims to have moved away from the overly abstract influences of serialism – an extension of the 12-tone

abstract influences of scrialisman extension of the 12-tone music that moves in scenningly arbitrary circles rather than keys — Tower's music is definitively rooted the contemporary experience and deeply personal. "(Scrialism) was too abstract and dense, I wanted to explore other worlds," she said.

Her first orchestral work composed in the early 1970s, "Amazon II," integrated many of the local South African cadences. And her subsequent works, such as "Sequoia" and "Noon Dance," drew on folk motifs and ambitious, bold swings of energy.

But according to Tower, audiences have been reluctant to open up to the works of new composers, preferring to listen to reinterpretations of the works of the masters.

"Music is the most pure and most stubborn art form," said Tower from her home in Annandale, N.Y., where she teaches at

Bard College.

In many ways, the contribu-tions of women composers in classical music lags far behind other fields, such as the visual arts and literature.

arts and literature.

"Look at the history of music, there are very few women," she

with her late 1980s composi-tion, "Fanfares for the Uncommen Voman," Tower found a subtle and effective way to give Copland's widely recognized piece ("Fanfare for the Common Man') a distinc-tively sexual/political slant. In 1990, Tower was the first woman to win the biggest prize in contomporary music, the \$150,000 Grawemeyer Award, for her orchestral work, "Silver Laddors."

But clearly, Tower isn't inter-ested in being labeled a "woman

cated in being labeled a "woman composer."

The first listener is yourself, and the second listeners are the performers," she said. "If the player doesn't respond, then the audidnce won't feel the energy and emotion of the music."

With her music being played at five musical festivals this summer, it's unlikely that anyone thinks of Tower's work as background music.

resemble a big city drive-time jam.

"It's still a very young show and a work-in-progreas," she said. "We're optimistic. West Bloomfield is an area where art is appreciated."

"Some day, we'd like to be recognized on the level of 'Art and Apples' (in Rochester).

For a weekend in mid-September, Art & Apples takes over Rochester. Hundreds of thousands of people stream into and around Rochester's Municipal Park. A recent study conducted for the Paint Creek Center for the Arts, organizers of the event, revealed an impressive economic spin-off during the festival weekend.

But like many fledgling festi-

end.

But like many fledgling festivals, the biggest challenge, said Schneider, is to build an identity and build audiences.

nd build audiences. To clevate the festival's profile, the chamber hired Howard Alan Events Ltd. of Florida, which handles the promotions of festi-vals across the United States.

Although if this year's estimated 75,000 people attend, parking lots and traffic congestion could resemble a big city drive-time iam.

'It's still a very young show and a work-in-progress. We're optimistic. West Bloomfield is an area where art is appreciated.'

Betsy Schneider Chamber of Commerce

According to Schneider, the omphasis of the festival's first three years was to attract top-notch artists. With that accomplished, this year's festival has stepped up the marketing effort.

"Wo're not a 'crafty' art fair, but a fine art, juried show," said Schneider. "People who buy art know the difference."

Although this year out-state vendors have been brought in to the festival, Schneider expects that beginning next year, local restaurateurs will provide the food and beverages.

Eventually, this festival will represent the identity of the West Bloomfield community, she said.

Going downtown in suburbia,

Going downtown in suburbia,

after all, just might be a state of mind.

Local artists
