Patience: Sam Jungerman of Mobile Ed Productions works with Jennifer Johnson, a fifth grader at Our Lady of Sorrows. Jungerman showed students how important chemistry is to our everyday lives.

Chemistry

Sorrows students learn it matters

Students at Our Lady of Sorrows School in Farmington recently found out that chemistry really does make a direct impact on their daily lives.

They mixed two chemicals to create Polyfoam, which is used in the making of bicycle helmets. The issue of requiring youngsters to wear bike helmets is one being delved into by various area municipalities, including Farmington Hills.

During a schoolwide assembly, "Chemistry: It Really Matters," presenter Sam Jungerman of Redford-based Mobile Ed Productions worked with volunteer students.

Our Lady of Sorrows is a private Catholic school for students in grades K-8.

Now watch... Sam Jungerman shows Danny Lentz (in photo at left) and Jake Groenbach (in photo at right) how to conduct experiments.

3-Day Only Sale June 11th, 12th & 13th
