# **Butterfly watchers** get help from book

Butterflies are always beautiful to watch. I think even those peo-ple who are bor-derline wildlife

derline wildlife watchers, enjoy the colors and delicate nature of butterflies. Such exquisite beauty in such an ephemeral body puts us all in wander about

wowless and chemeral body pits us all in wander about these creatures.

Many books, organizations and people are devoting time and energy to watch butterflies and to encourage others to do the same. Wildflower plantings along roadsides, butterfly gardens and butterfly houses all help people enjoy the 195 species of butterflies that have been seen in the state.

This figure of 169 species comes from the new book "Michigan Butterflies & Skippers" by Mogens Nielsea. Nielsen is the authority on butterflies for the state of Michigan. The book is published by Michigan Batte University Extension.

Books on Michigan snakes, Nielsen outlines many different habitats where various butterfly species can be found. Many appecies of butterfly are restricted to habitats where particular plants grow. Though the adult may feed on nectar from a variety of plants, larvae, or caterpillars, are much more limiting in their choice of food. Adults must lay their eggs on the order species of plant, or the young caterpillar will die.

With a copy of "Michigan Butterflies species of butterfly are restricted to habitats where particular plants grow. Though the adult may feed on nectar from a variety of plants, larvae, or caterpillars, are much more limiting in their choice of food. Adults must lay their eggs on the correct species of plant, or the young caterpillar will die.

With a copy of "Michigan Butterflies & Skippers" in hand, you the come family.

or quantities of water, butterflies are frequently found near their heat plants.

Though the color photographs are smaller than I would like, they show various color types through the seasons and differences between males and females. Reference to size could have been accomplished with the heading lines for each species, but other field guides do this very well.

This book is not intended to be a one resource field guide, rather it is intended to encourage others to get into the field and enjoy butterflies. Outstanding maps accompanying each species description pin-points the locations within the state where each species has been verified. No other field guide has such accurate maps.

In the front is a complete list-

#### ARCHERY

ARCHERY

BOA 30 SHOOT

Royal Oak Archers will hold a
3D shoot beginning at 9 a.m.
Sunday, July 18, on its walkthrough course in Lake Orion.
Call (248) 628-8304 or (248) 6892489 for more information.
