Berlin, Germany.—The old home of
the doll is Thuringia, especially the
town of Sonneberg, 12 miles from Coburg. Most of the poorer families in
and around Sonneburg, wites ConsulGeneral Frank Dilli gham at Coburg,
are engaged in tha industry, which
is the chief source of revenue of the
population, giving employment for the
whole year. The work demands
well as times and without the
whole year. The work demands a
great deal of practice and agili, and
well as times and without the proposition
with as times and without the year
finally able to work with astonishing
accuracy and speed. In the doll in
dustry only some special part of the
dolls is made by each person. Some
make the bodies, others the heads and
still others the arms, hands, etc. Ify
this division the work is done much
quicker and better.

The heads are first modded, and
when sufficiently dry the eyes are cut
out by a skilled worker with a mely
division of the Arter being burned
the heads are painted, waxed or
glazed, depending on the material
from which the heads are made. The
arms, lega and hands are produced in
a similar but simpler manner, as the
painting consists only in giving the
necessary flesh color, while the heads
must have rosy cheeks, red lips and
dark or light eyebrows, depending and
the color of the errow, depending and
the color of the errow, depending
the of the wigs Involve a number of
other processes.

The doll industry is now commencing to make the "character doll" ind-

ing of the wigs involve a number of, other process.

The doll industry is now commencing to make the "character doll" in restricted numbers. The model is made by an artist and the moids are then copied from this model. The patinting of these doils is done with especial care, and, consequently, their price is considerably higher than that of the commoner type of doll. The assembling of the different parts of the dolls is often very complicated. The best jointed dolls have stout elastic cord on the inside, to which the movable parts are attached. A special branch of the industry is

Hotel in Thuringia.

Pokin, China—It is difficult for the Occidental mind to picture the wall within wall life of a Chinese home, says a writer in the Century. Down a marrow lane one passes between two walls, behird which may be hovels or palaces, there is no telling which, since the one story roofs beyond are furtiship. In the big experiment with govern-ment hornes at Fort Riley just com-pleted by the Kannas Agricultural col-lege it was found that other feeds may be substituted entirely for outs in a ration for work horses with as good results and much cheaper. The results of this test, in wise made public for the first time at the state insti-tute.

BREADS.

BREADS.

For those living in the country or small towns, where fresh coimpressed yeast cake is not obtainable, the following mechanic of making bread will be found most satisfying, in fact it is used by many city households, who prefer it to any other:

Cook six mediumsized potatoes in water to cover; mush and strain the potato and water in which. It was cooked over four tablespoontials of industry, four tablespoontials of atablespontial of high in a cup of water posts, and it is a considerable of the constant of water, and when the constant of the con

yeast care tuat cas usen sottened in a little water. They yeast is now ready for bread.

About two hours before the bread is needen part as he had for the yeast mixture, and they are the some shortening, with flour enough to kneed as soft as it can be handled. Kneed ten misutes, make into loaves or buns and when light bake without further kneed ing.

This bread is so simple to make, so good in flavor and one can prepare it on short notice, that every bossewife should keep some of the yeast of Cashan Bread. Take three cuses of

and. Graham Bread. Take three cups of

Graham Bread — Take three cups of graham Borr, two cups of sour milk, two teaspoonfuls of soda, two-thirds of a cup of dark hows sugar, a pinch of sait. Mix all dozether and bake one hour in a show o'en.

Brown Bread,—Three cups of graham flour, two of white flour and one of corumeat, a half cup of sugar, a teaspoonful of sait, two cups each of warmed aweet milk and two of water; add a compressed yeast cake, beat well, put in tins at thight, (over air tipth. Bake in the morating pue hour. This makes
