Changing of the Guard

Tyndale College gets new interim leader

Interim president: Jerry Bringard stands in front of the entrance to Tyndale College in Farmington Hills

BY MARY RODRIQUE

The new acting president of William Tyndale College can trace his family's involvement with the school back to its beginnings as Deroit Bible College in the 1940s.

Image as Server Induced one with 1940s.

Jerry Bringard's father, Elmer, a physician, taught medical missionary classes at the school and later served on the small Christian liberal arts college's board of directors from 1959 to 1970.

Jerry, an attorney who retired three years ago as vice president/general counsel of Ford Motor Credit, has served on the Tyndale Board of Trustees since 1977.

1977.
Outgoing president James
McHann left the Farmington
Hills college in May to oversee a
technical learning center in
Madison Heights.
"The board was looking for an

acting president quickly," said Bringard. Being the only retired trustee living full-time in the metro Detroit area (he lives with his family on Grosse Isle) he was tapped.

Shared mission

Shared mission
"Because of the capital campaign, they preferred a board member to take over," he explained. 'Our goal is to make sure everyone is working toward a shared mission. We hope to eventually have a world class mind lab and science center."
For the past couple months, Bringard has commuted to the campus on Twelve Mile west of Drake roads, often with brown bug lunch in hand. He likes staff to call him "Jerry" and keeps his door open at noon, encouraging any and all to join him for lunch." It's a great job, a fun job, but normally the college presidency is held by someone who is an educator and one of these days!

i'm here to help them reach their full potential. My plan is to get everyone comfort-able. I have an open door policy.

Jerry Bringard acting Tyndale President

watched the college grow and broaden to the Christian liberal arts college it is today. "It has been a privilege to be on the board as we plan for the future, and a great experience to be a part of something where the association goes back to the beginning.

beginning.

"My goal is to keep it or course. We have outstanding people who work here. We need to keep moving toward that shared vision."

to keep moving toward that shared vision. The ideal candidate for president, according to Bringard, should be "someone who is a visionary and a leader to carry the plan to fruition. That person should be a manager and a fundraiser, too. If you can find it in one person, you're fortunate."

Tyndale currently has about the statement of the statem The ideal candidate for presi-

to a year to find someone," he noted.
Bringard and his wife, Mary, have two daughters. Melissa, 24, is a graduate of Hillsdale College and teaches third grade on Grosse Isle. She was an All-America awimmer at Hillsdale. Daughter Gillian, 17, will be a junior at Grosse Isle High School in the fall, where she is ranked the number one singles tennis player. The family enjoys traveling across the US and Ganada.

When Tyndale College began, it prepared pastors and missionaries," Bringard recalled. "I've

"Our goal is to identify com-

The Epilepsy Foundation of Michigan has been awarded an epilepsy research grant taking advantage of the Human Genome Project to determine which genes cause epilepsy and seizures.

The Epilepsy Foundation of genes that are abnormally expressed in opileptic brain tissue taken during epilepsy regressed. The Judgment of the Comprehensive which genes cause epilepsy and seizures.

epilepsy have small regions of the brain that are abnormally electrically excited that initiates a "shock wave" through their brain which produces seizures. Exactly what causes this small region of the brain to produce seizures is still a mystery. Recently, research has been done to identify these shormal brain regions and remove the opleptic tissue. In many cases, this method can cure seizures. The Human Genome Project is an international research effort aimed at identifying genes and determining their precise location on each of the human chromosomes. Once the project is completed, the location of genes on the human chromosomes and their chemical makeup vill be known. The next step is to deter Center.

do want to retire," he says when asked if he'd consider the post

full-time.
An executive search committee

is forming to search for a perma-nent replacement for McHann. Bringard expects to captain the ship at least through the coming

school year.
"It usually takes eight months to a year to find someone," he noted.

mine which ones play a role causing epilepsy and seizures. Epilepsy affects 2.3 million Americans of all ages, including more than 98,000 in Michigan. There are more than twice as many individuals affected by epilepsy in the United States as the number of individuals with cerebral paley (500,000), muscular dystrophy (250,000), multiple selevois (350,000) and cystic fibrosis (30,000) combined. Eatablished in 1948, the Epilepsy Foundation of Michigan provides seizure management, employment guidance, advocacy, epilepsy awareness, information and referral, and support services to individuals with epilepsy, their families, and the general public.

50TH ANNIVERSARY

CLARKE 50TH

Patrick and Sally Low Clarke celebrated their 50th wedding anniversary in May. They were the first couple married by Rev. Lord in the Orchard United Methodist Church. They both
