

**"it's improved
a lot more
than just his
hearing."**

"When I first noticed my husband asking me to repeat myself, I knew something was wrong. When he started losing his interest in anything involving large groups, I knew something had to be done."

A friend of ours had a hearing test and was told hearing aids could help her. Now she hears sounds she was missing and feels more involved when talking in larger groups. That's when I knew I had to make an appointment for him."

A hearing consultation is important, especially if:

- › you have difficulty understanding others.
- › you suspect you have a hearing problem.
- › you have trouble hearing TV, the phone, or other everyday sounds.
- › it has been over 12 months since you've had a hearing test.

**a style, size,
and price to
suit almost
everyone**

Today's hearing instruments come in a variety of prices, sizes, and technology to match your hearing and lifestyle needs, including the highly popular and discreet **completely-in-the-canal**.

**Completely
in-the-canal**

Hearing instruments can improve a lot more than just your hearing. If you or someone you know has a hearing problem, call today for an appointment.
