BUSINESS EDUCATION

Gradually the authorities in our educational matters are coming to appreciate the value of a thorough business education. It is now seen that a knowledge of business methods and customs is of more practical value to the average young person than a full course in the dead languages or even higher maternatics. The graduates of the well known Detroit Business University, which for more than 60 years has been giving a splendid training for business pursuits have been active in advancing the claims of business education and of this particular school. This has much to dowith the fact that this institution is everywhere regarded as the pioneer and the par excellence today among business training schools.
