Three reasons for the SAFETY of the New Ford Cars

\$550
(F. O. B. Detroit, plus
charge for freight and
delivery. Bumpers and
 spare tire extra.)

1. Fully enclosed six-brake system
2. Strong frame and body
3. Triplex shatter-proof glass windshield

THE new Ford is a great car to drive not only because of its acceleration, smoothness, speed, comfort, reliability and economy, but also because of the safety resulting from the sturdy frame and body, the fully enclosed six-brake system and the Triplex shatter-proof glass windshield.

This shatter-proof glass windshield is an especially important safety feature because it eliminates the danger of flying glass—the cause of 65% of automobile injuries.

It is furnished without extra cost and is just another indication of the quality that has been built into every part of the new Ford.

By all means, see the new Ford car and arrange for a demonstration. You will know then that it gives you everything you will want or need in a modern automobile.

Among its features are—beautiful low lines and choice of colors . . . quick acceleration . . . 55 to 65 miles an hour . . . vibration-absorbing engine support . . . Alemite chassis lubrication . . . theft-proof ignition lock . . . four Houdaille hydraulic two-way shock absorbers . . . low first cost and economy of operation . . . typical Ford reliability and long life.

The Writing Game

By RING LARDNER

To the Editor:

The folks letter read, from 1 of my admirers in Brazil, lad, exclaims it self.

"Dear Sir, I been reading your letters in these cols. for a good many mos, and find them very interesting, a specially the letters advertising that you was to start a school of photo play writing and in these letters you give your readers a good many hints in regards to how photo plays should be wrote as well as a sample of a 5 reel photo drama. Now no doubt they's a great many people that considered themselves capable of writing photo plays but couldn't afford to take none of the high price correspondents courses in same and would always reputain a drug in their office or somewhere had you not of come to bit with your low price school.

"Now what I ask is why won't you be as thoughtful of the people that wants to write short stories like you was to the ones that wanted to write for pictures. I have always feel like I had a gift for writing short fictions but don't know nothing about technique, length of stories and etc and couldn't dig up the price which is demanded by the correspondents schools for tuition and etc. It seems to me like you are well qualified to learn people the art of story writing even better than other kinds of writing because I once read a story of yours in a magazine which you must of been the editor's brother in law but still all it was printed and you probably got payed for same which is more than you can say in regards to your efforts at photo plays. So will you be so kind and open up a course in short story writing and give us a idea in these cols. what the secrets and principals is that makes a successful short story fiction writer and I am only 1 of those kids that will be interested and maybe submerge to your school."

The writer to the above is not the only party that has come to me with requests along the same lines, and it begins to look like I would be doing a public service were I to comply with their requests along these lines.

In the first place the average party has got a magazine editor all wrong which they usually are. They think he is a man that will give everybody a square deal when he is the most of them just their personal feelings and temperament got the best of them.

The best rule for a new beginner to follow is to let get a idea for a story and then forget the editor and go ahead and write the story out or dictate it to somebody that has got a good hand writing or better yet one of these new fangle machines called a typewriter that makes it look all neat like print.

Then put a good suggestive title on the story like for inst. "Lara's Calves" and then give it to your family to read, and if they say it reads good why it must be good, and the next question is how to get it before a magazine editor and get a square deal.

But 1 of the biggest mistakes a new beginner makes is to send return stamps along with their manuscript as most of the editors is all right and the minute they see stamps that somebody else has boughten why they can't wait a minute till they use them, and whilst back comes your name right. I remember once before I wrote a wise crawler that I sent a stamped self address envelope along with a good story I wrote and the old skin that shot it back at me proen all because he couldn't do nothing else with a addressed envelope with the stamps stuck to it and couldn't bear to see it wasted. Both my sisters read the story I speak of and said it was a ddy, and I wished the old skin could of heard what they said about him for sending it back.

Well then the only way to get a square deal from a editor is to scrub up a acquaintance with somebody that is all ready in the writing game and the editor knows who he is and not respects for kin and then you have this bird write a letter for you to send along with the manuscript and have him say in the letter that your story is O. K. and the editor is a say if he don't accept because you have got a lot of friends that will stop their subscription if that story comes back.

So much for how to get a square deal after your story is wrote. As for the writing itself a good many new beginners falls down because they try and write their story without the right atmosphere to work in. I can't give no advice on this subject as different authors demands different working conditions. For inst. they say Rupert H. Hughes can't write a line unless the water is running in the bathtub and Fannie Hurst won't attempt to work without the room is full of sunshine and when as when the editor wants a story out of Mrs. Ritchart they get somebody to sit down and snip a rubber band at her neck. Personally I never feel comfortable at my desk unless they's a dozen large rats packed on my ft. These inst will give you a idea of how different temperments affects different writers but, as I say, each writer has to choose for himself what temperment to have and I might advise you to try writing in a public garage where as you might do your best work setting in a bed trap.

First Steam-Shovel On Grand River Job

The first equipment to be placed on the Grand River widening job was moved to a spot in the Children's Hospital of Michigan grounds Thursday. The steam-shovel was hauled to a point near where the Cut-off will intersect Grand River avenue. It is expected that work will be started with a good crew of men next Tuesday morning.
