**Simplicity of design
means better
Performance**

"MAKE IT BETTER"—Make it simpler has been the keynote of Ford engineering and manufacturing methods. This policy has been carried forward to its highest, fullest expression in the new Ford.

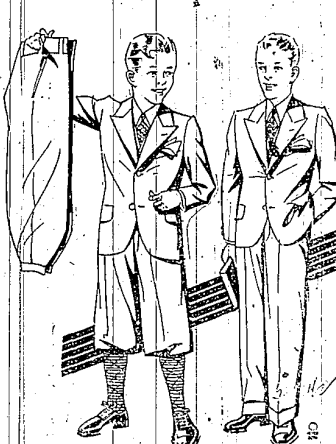

You see evidence of a carefully planned simplicity of design the instant you lift the hood. Its value becomes apparent when you drive the new Ford.

In every detail, as well as in the engine, the whole tendency is to give you the most performance with the least machinery. The result is that the new Ford is more reliable, more economical, more easily kept in the very "pink" of condition. These are advantages that every wise buyer of motor cars looks for and appreciates.
