## Girl Teaches Orchard Thieves—With Pistol

Orchard raiders continue to bother farmers around this section, but four of them will not trespass in orchards any more. They've been taught their lesson by 16-year-old girl, and just to make it more effective, Judge J. J. Schulte Jr., of Farmington, fined them \$25 each.

Raiding the orchard of Leroy Curran on 13-Mile road Sunday, the four were detected by Wanda Curran, 16, and ordered to wait while she called officers. Instead they entered their car and hurling some contemptuous remarks, started away.

Miss Curran promptly drew a .38 pistol from a pocket in her dress and shot the left tire of the car full of holes. The four then waited until Deputy William Tamm arrived.

Harold McCracken, who went to the scene of the raid, on returning saw some men in William Walker's orchard, and ordered the alarm. Complaints were filed against these men, who were placed under arrest.

The four in the Curran orchard were a Detroit couple and two men friends.

## Men Are Popular In Farmington, It Seems

Men are the big attractions in Farmington. That is proven by the reports on ticket sales for the performances of the "Womanless Wedding" Thursday and Friday evenings. Every ticket for both performances had been sold by Wednesday morning. Families of some of the performers are seeking in vain for tickets.

So great was the demand that some members of the cast suggested a special midnight performance Friday night. Meanwhile, the mystery continued as to the identity of the "groom." "Who???"

## FIRE PREVENTION WEEK TO STRESS PROTECTION IN RURAL DISTRICTS

Fire Prevention Week means more this year than ever before because activities along that line will be extended into the rural districts instead of being confined principally to cities and villages as heretofore. The apparent increase in the burning of farm buildings was brought to the attention of Governor Green and State Fire Marshal Livingston, with a request that efforts be made to interest the rural people in the proper observance of the occasion.

The period set for Fire Prevention Week comes during the most busy time of the year for folks on the farm. In early October they are gathering their crops with all speed possible, that they may be marketed or safely stored before freezing weather.

That plan as devised for Fire Prevention on the farm requires but a part of one day, which any farmer may well devote to safeguarding his property against fire.

Plans for carrying out the rural inspection are as follows: Teachers of all Michigan rural

schools will be furnished with Fire Prevention literature which applies to rural property, which will be read to the pupils, Friday, October 11th, making that Fire Prevention day in rural schools. At the close of school that day, one pupil in each family will be provided with an inspection blank, which will be taken home to the parents. On Saturday morning, October 12th, the parents are urged to join with their children in making an inspection of their property, recording the results on the inspection blank furnished, which will be returned to the teacher the following Monday morning. The teacher will forward all inspection reports to the State Fire Marshal, Lansing, which will form the basis reports which will later be made from that office.

Parents, living in the country, who have no children in the schools, will be provided with inspection blanks by the teacher of the local school, that they may join in this laudable undertaking, making their district 100 per cent, returning to completed inspection blank to the teacher who will forward same with those returned by the pupils to the State Fire Marshal.
