

TAKE FOLEY KIDNEY PILLS

Official Scoring.
"Should Blucher get the credit for winning Waterloo?"
"No," that victory is properly credited to Wellington. Blucher did not relieve him until about the eighth inning."

PIMPLES COVERED FACE

1613 Dayton St., Chicago, Ill.—"My face was very red and irritated and was covered with pimples. The pimples fastened and came to a head. They itched and burned and when I scratched them became sore. I tried soap and they would not stop the itching and burning of the skin. This lasted for a month or more. At last I tried Cuticura Ointment and Soap. They took out the burning and itching of the skin, soothing it very much and giving the relief that the others failed to give me. I used the Cuticura Soap and Ointment about three weeks and was completely cured." (Signed) Miss Clara Mueller, Mar. 16, 1912.

Cuticura Soap and Ointment sold throughout the world. Sample sent free, with 32p. Skin Book. Address post-card, Cuticura, Dept. L, Boston. Adv.

Submit Tamely.
"Is Scribner what you would call a struggling author?"
"No, indeed. When an editor puts him out he doesn't offer the slightest resistance."

Righteous indignation.
Little Ruth was the youngest daughter in a very strict Presbyterian family that especially abhorred profanity. One day little Ruth became exceedingly exasperated with one of her dolls. In her baby vocabulary she had no words to express adequately her disapproval of doll's conduct. Finally, throwing the offending doll across the room, she cried, feelingly:
"My gracious! I wish I belonged to a family that sweated!"

A While for a Time.
A Cleveland school teacher wrote that she asked her class what was the difference between the expressions, "a while" and "a time," says the Cleveland Plain Dealer. Nobody seemed to have any idea on the subject. Finally the light of intelligence was seen to shine in the eyes of one little boy, and the teacher called upon him to save the intellectual honor of the class.

"I know, teacher," he cried eagerly. "When papa says he's going out for a while, mamma says she knows he's going out for a time."
That's one way of looking at it.

Eggs Clotworthy Ate.
Harry Clotworthy, who is an expert on military affairs, entered the diningroom of the National Press club one morning and carried with him a ravenous appetite. Having eaten one breakfast, which consisted largely of eggs, he ordered another breakfast, which consisted even more largely of eggs. After his repeat he took to the writing-room to get off some letters. He was later the steward of the club found the colored waiter loading about the entrance of the writing-room and asked him what he meant by being absent from his post.

"I got a good excuse," exclaimed the waiter, exhibiting the check for the egg breakfast. "Mr. Clotworthy done eat 'em worth of eggs and I ain't goin' to let him get away from here without payin' for them, high as eggs L now."

"GOOD STUFF."
A Confirmed Coffee Drinker Takes to Postum.
A housewife was recently surprised when cook served Postum instead of coffee. She says:
"For the last five or six years I have been troubled with nervousness, indigestion and heart trouble. I couldn't get any benefit from the doctor's medicine so finally he ordered me to stop drinking coffee, which I did."

"I drank hot water while taking the doctor's medicine, with some improvement, then went back to coffee with the same old trouble as before."

"A new servant girl told me about Postum—said her folks used it and liked it in place of coffee. We got a package but I told her I didn't like it. My husband would like it, as he was a great coffee drinker."

"To my surprise he called for a third cup, said it was 'good stuff' and wanted to know what it was. He has used Postum ever since and both feel better than we have in years."

"My husband used to have bad spells with his stomach and would be sick three or four days, during which time he could not eat or drink. The thing, but since he gave up coffee and took to Postum, he has had no more trouble, and we now fully believe it was all caused by coffee."

There are not but any return of my former troubles since drinking Postum, and feel better and can do more work than in the last ten years. We tell everyone about it—some say they tried it and did not like it. I tell them it makes all the difference as to how it's made. It should be made according to directions—then it is delicious."

Named given by Postum Co., Battle Creek, Mich. Read the book, "The Road to Wellville," in place. "There's a reason."

Ever read the above letter? A new one from the same writer. "The Road to Wellville," in place. "There's a reason."

Never fasten fencing wire directly to growing trees. If you do, in a few years the wire will have become incrustated in the tree and do it permanent injury. When you wish to use a tree for this purpose, apply a strip of sound board securely to the tree and fasten the wire to that. In this way very little injury will be done to the tree.

The great bulk of the oat crop of the world is produced within the boundaries of the temperate zone including the countries of Russia, Germany, Norway and Sweden, Canada, the north and part of the United States. Russia produces more than any other country.

The fruit farmer can always find something to do, either in the orchard or around the buildings. This business, like any other, is runned by the farmer. Keep the house ends well in hand for the best results.

NOTES from MEADOWBROOK FARM

By William Pitt

Sheep deserve good care.

Asparagus is a hardy plant.

Onions stand considerable cold.

A kerosene bath for roasts is urged.

The dairy cow should essentially be a large and rich milker.

There is more or less risk in feeding ordinary silage to lambs or sheep.

It is a well-known fact that alfalfa does not do well upon an impervious subsoil.

In feeding dairy cows give them all they will clean up at each feed but no more.

Range-bred lambs are far superior to native-bred lambs for breeding purposes.

Geese must be kept out of dampness and fed only grass, water and coarse feed.

Don't fail to divide the buttermilk between biddy and the pigs. She relishes it as much as they.

The grape root worm has committed extensive depredations among the vineyards of Pennsylvania.

A toothbrush and a little naphtha will clean your velvet coat collars and make them look new again.

Select one dairy breed and stick to it. Don't mix up the breeds or you will spoil the sale of your stock.

All fowls, chicks, ducks and ducks that are kept in yards should have plenty of green feed every day.

If the frost kills the vines of the sweet potatoes cut them off as soon as possible or the potatoes may turn black.

The spring colt should be pretty well broken by this time; if not, this is a good month to get acquainted with him.

Clean the stock tank, and keep it free from moss. Then fill it with fresh cool water. The stock will appreciate it.

The manager of the dairy farm must supply the brain. The success of the undertaking will depend largely upon him.

Early Six Weeks is a good potato for a short time, but it soon loses quality. A few rows in the garden can be handy.

Let the cows sleep out in the pastures until the very chilly nights come on. Better for them than to lie in a stuffy barn.

If pastures are falling feed a little fodder each day to the stock. It makes them more contented and less inclined to try the fences.

Farmers and feeders will this year welcome full corn cobs. It is risky business at best making meat from 75-cent corn and we will all welcome cheaper grain.

Farm orchards seem smaller and worse neglected than they were ten years ago. Perhaps the reason lies in the fact that small lots of fruit hardly ever sell profitably.

If the sheep are compelled to dig in short pastures for their living they will eat the roots of the plants. Better divide the pasture and feed one part while the other is catching up.

The number of silos in Kansas has increased if not quite doubled in the last year. If they were not profitable do you think they would be built? We are not working for the fun of it any longer.

After the pigs have been put into the fattening pen in the fall they should be fed all that they will eat with a relish, for, as a rule, the shorter the fattening period the larger the profits.

A duckling does not know how to get out of danger. Instead it will become panic stricken and remain easy prey for the enemy. On the contrary a chicken is always on the alert, scampering off to some hiding place the moment it hears some strange noise.

Never fasten fencing wire directly to growing trees. If you do, in a few years the wire will have become incrustated in the tree and do it permanent injury. When you wish to use a tree for this purpose, apply a strip of sound board securely to the tree and fasten the wire to that. In this way very little injury will be done to the tree.

Hogs return quick profits.

Freshen up the poultry runs.

The separator is a helpful factor.

Agricultural fairs are of much value.

The first and greatest law of breeding is "like begets like."

A sheep that is in good condition in the fall is half wintered.

Tankage is one of the very best commercial feeds in fattening hogs.

Silage and alfalfa combined make the foundation of the best dairy ration.

Ducks are very fond of dandelions chopped and mixed with ground grain.

Cattle should have access to water at all times when pasture pasture is getting dry.

"Too little phosphorus" is the cause of many of the low yields on corn belt soils.

Have the ropes and straps good and stout when you begin to halter break the colt.

There seems to be a good deal of prejudice against millet because it exhausts the soil.

Shrimp your sheep on good pasture and they will skip you like a cat.

The value of corn silage to the beef producer is not limited to its use in winter feeding alone.

Keep the laying hens working. To do this feed them at daybreak and just before noon.

Wait until cold weather has absolutely put the last dry out of business before debarring the cattle.

Instead of using an old wooden watering tank make one of cement that will never decay or leak.

The longer the calf is allowed to suck the harder it will be to make it drink from a bucket.

After a day's work clean the work horses thoroughly, wash their legs from the knees down and rub dry.

Raise horses for big money, cattle for sure money and hogs for quick money, is an old saying, and a good one.

A year ago there was more stock than there was feed. Now there is feed for more stock than can be found.

In building a wire fence for hogs put one barbed wire at the bottom, and the worst rooster in the pasture won't root out.

Don't be afraid to apply air-slaked lime to the cabbage with a blow gun. It will destroy the worms on the head of the cabbage.

Young fruit trees that were planted in the autumn of last year, or in the spring of this year, should be examined carefully.

The garden as should be the best on the farm. Best prepared, best fertilized and best cared for. Then it will give the best returns.

While the orchard is coming into bearing try vegetable growing as a side line. This makes one of the surest and best sources of income.

Chopped roots, fed along with the grain, will make a valuable addition to the ration, especially if winter grazing or silage is not at hand.

Keeping any machine well oiled and in proper repair not only increases efficiency, but decreases the amount of power required to run the machine.

Do not allow the cows to dry up during the latter part of the summer as this necessitates keeping them through the winter, giving a smaller flow of milk than they should.

Land planter has a very small per centage of time; lump lime has the largest percentage, and hydrated lime. Marl is usually a little richer in lime than ground lime stone.

For the last six months the hog feeder has but little more to brook even. If we are to judge the future by the past there is a time coming soon when the hog feeder will make good money.

The peanut is becoming more important as a feed for stock, especially in the southern states. The vicer with the nuts attached are often cured, and they make a palatable bait for all kinds of farm stock.

The fruit farmer can always find something to do, either in the orchard or around the buildings. This business, like any other, is runned by the farmer. Keep the house ends well in hand for the best results.

HONDURAN REVOLT ENDS

Fugitive Rebels Overtaken by Nicaraguan Government Troops

An uprising against the Honduran government, started by participants in the Nicaraguan revolt, came to a sudden and bloody end before the expedition got out of Nicaragua. The refugees, 200 in number, under Jose Rafael Osorio, a Honduran, were overtaken by Nicaraguan government troops at Sonoma, where they approached the Honduran border.

Forty were killed, many others, including the leader, were wounded. All gave up their arms and the entire movement was speedily dispersed.

Minister Weizel in reporting the affair, the state department said the refugees, who were bent upon starting a revolution against President Bonilla's government in Honduras, had fled from Leon, where the city was turned over to the American forces.

The complete failure of the movement against Honduras is believed to end the hopes of the revolution in that country, but to mark the end of disturbances in Nicaragua.

THE MARKETS.

DETROIT.—Cattle extra dry-fed steers 13.50; steers and heifers, 1.00 to 1.20; hogs, 11.00 to 1.20; pigs, 1.00 to 1.20; sheep, 1.00 to 1.20; chickens, 1.00 to 1.20; turkeys, 1.00 to 1.20; ducks, 1.00 to 1.20; geese, 1.00 to 1.20; corn, 1.00 to 1.20; wheat, 1.00 to 1.20; oats, 1.00 to 1.20; barley, 1.00 to 1.20; rye, 1.00 to 1.20; clover, 1.00 to 1.20; alfalfa, 1.00 to 1.20; timothy, 1.00 to 1.20; hay, 1.00 to 1.20; straw, 1.00 to 1.20; manure, 1.00 to 1.20; fertilizer, 1.00 to 1.20; lime, 1.00 to 1.20; cement, 1.00 to 1.20; brick, 1.00 to 1.20; stone, 1.00 to 1.20; lumber, 1.00 to 1.20; coal, 1.00 to 1.20; oil, 1.00 to 1.20;
