Shoe "Mileage"

Inquiry has shown that the thing buyers of auto tires seek most is mileage. With shoes, it is long wear.

And as in the case of tires, prompt repairs by an expert results in greatly increased wear. We are experts.

LARGE AREA FOR GAME
Michigan has now dedicated to the protection of game and other wild life, 125,118 acres of land.

Roughly this 125,118 acres of land is of three classes; those areas owned and controlled by the State; those privately owned but under special state protection; and those additional acres set aside as refuges and sanctuaries by legislative action or by the Conservation Commission using its discretionary authority.

WINS THE WATERMELON
A Sabetha, Kans., merchant offered a 55-pound watermelon to anyone who could carry it home without setting it down. The Rev. A. L. Hope won the melon. It was an eight-block walk.

RIGHTS SETTLED
Homesteaders, hunting clubs and every other purchaser of State owned land since 1909 have no priority rights to oil and gas under their lands, which, for the past 20 years have been served by the State. These homesteaders and owners, however, are protected from damage to the surface by lessees of oil and gas.

300TH CROP FOR PEAR TREE
The weight of three centuries has split its trunk into three parts, but the famed old Endicott pear tree at Danvers, Mass., is once more bearing its October fruit. This is the 300th lineal crop of the earliest cultivated tree in New England.

BEAVERS NEAR HERE
Seemingly isolated from all of their kind, and within 35 miles of Michigan's largest city, a colony of beaver, believed to be 8 in number, has constructed a dam across a creek, built a home and has established themselves.

To protect this colony 40 acres surrounding their dam and home have been dedicated by Howard J. Inwood of Romeo, Macomb County as a wild life sanctuary.

SANCTUARIES ACCEPTED
Ten wild-life sanctuaries having a total area of 3,684 acres were dedicated by their owners and accepted by the State Conservation Commission at its last regular meeting.

For Economical Transportation

Millions of Miles of Constant Testing

to maintain the outstanding quality and dependability of

The Chevrolet Six

In spite of the fact that a million Chevrolet Sixes have already been placed in the hands of owners, and have proved their performance and stamina by billions of miles of service over every type of highway the nation affords—

the Chevrolet Motor Company continues to take new Chevrolet Sixes from the assembly line at the factory and subject them to pitiless testing on the roads of the General Motors Proving Ground!

This passion for proof—this consistent refusal to accept any

tests as final—is one of the fundamental reasons for the overwhelming popularity of Chevrolet cars. For in no other way is it possible to make the Chevrolet Six so sound in design and materials—so dependable in performance—and so economical to operate!

If you are considering the purchase of an automobile, come in and see the new Chevrolet. You will find that it is more than a Six in the price range of the four. In every way it is a finer car than you ever thought possible in the low-price field!

A SIX IN THE PRICE RANGE OF THE FOUR

The finest car for the money because of these

big car FEATURES

Read the partial list of Pontiac features at the right and you will see why Pontiac represents such an exceptional value and why it costs one cent per mile less to operate than any other low-priced six; according to the 1928 records of a large company using 996 automobiles of 33 different makes. Then come in and see the Pontiac Big Six and let us tell you about our convenient plan of purchase.

PONTIAC BIG SIX at \$745

Consider the delivered price as well as the list (f. o. b.) price when comparing automobiles. Pontiac delivered prices include only the car, taxes, license, and delivery and the charge for any additional accessories or financing desired. Minimum rate.

No car listing for less than \$1000 offers advancements to compare with these.
