## RIGHT SIZED BULB FOR THE BATHROOM

For bathroom lighting, the use of a 60-watt bulb in a lighting bracket on both sides of the mirror provides the best arrangement for convenience and for adequate illumination. In many bathrooms, however, there is only a single lighting fixture—and in this case a 100-watt bulb is very satisfactory.

If you are using a bulb smaller than 100-watts, try the 100-watt size and notice how it brightens the room and facilitates the use of the mirror.
