ORIGIN AND MEANING OF 'HORSEPOWER' TOLD

The origin and significance of the term "horsepower" probably is lost to the average motorist who speaks so glibly of the power developed by his car.

The horsepower unit was formulated in 1780 by James Watt, inventor of the steam engine, shortly after the product of his genius had proved its ability to replace the horses previously used at the mills, mines, breweries and distilleries of England.

Watt described one horsepower as the effort of a horse moving at two and one-half miles per hour and raising a weight of 150 pounds by means of a rope passed over a pulley, the effort being equal to raising 33,000 pounds one foot high in one minute.

One Out of Every Five Is Lost!

Engineering investigations show that for every five shovelful of fuel you put in your furnace, one is used in heating the water in the furnace coil and so represents heat lost from your heating plant.

Can you afford it?

And when the weather is warmer and your furnace fire is low or out, the water is lukewarm or cold.

Can you afford this inconvenience?

The modern way, the convenient way, the economical way, is to install a Special Heater "Built Like a Thermos Bottle." Piping hot water at lower cost.

CONSUMERS POWER COMPANY

You Will Want This Electric Clock, Electric Waffle Iron and Electric Percolator

Electric Percolator \$4.50

This 7-cup electric percolator is aluminum paneled—an attractive addition to your table. Extremely simple in construction and operation, it is easily and quickly cleaned. A safety fuse protects it when the percolator boils dry or is started without water. You will be delighted with the convenience of an electric percolator—simply plug in the connection and prepare your coffee right at the table, right at your elbow.

Waffle Iron \$5.95

A nickel plated electric waffle iron that makes waffles in two minutes—right at the table, right at your elbow, without grease or smoke. Snap the switch—pour in the creamy batter, and a delicious plate is soon ready. Light, crisp waffles may be enjoyed for breakfast, with butter and syrup; for noon luncheon, alone or as an added delicacy; for dinner, as dessert with cinnamon and whipped cream or hot, spiced apple sauce. They are a treat in a dozen different ways.

Electric Clock \$9.75 and up

The electric clock is a modern timekeeper—it needs no winding, no attention. You simply plug it into the electric outlet and forget it. Thereafter it keeps accurate time, faithfully and automatically. Enjoy this new convenience—install an electric clock in your home.

These appliances are reasonably priced, yet carry the unconditional Detroit Edison guarantee.
