

If some folks were to truthfully report their principal occupation to the census takers, they would have to say it is losing their money in speculation.

The people of former romantic days who used to inquire "When shall we meet again?", are probably asking in these prosaic times "When do we eat?"

The five states which had more than 100 students attending the University of Michigan, exclusive of Michigan, were: Ohio (1026); New York (828); Illinois (504); Indiana (368); Pennsylvania (368); New Jersey (119); and Kentucky (100).

Annual Report Made By Telephone Co. Head

Net income of the Michigan Bell Telephone Company during 1929 was \$6,618,709.79 which was short of dividend requirements by \$787,290.21, according to the annual report submitted by President Burch Foraker at the annual meeting of the Board of Directors, (Thursday, March 6). This was the second consecutive year that the company's earnings failed to meet dividend requirements. The dividend shortage in 1928 was \$11,293.29, and deficit under dividend requirements for the two years totaled \$1,198,584.10.

During the year 208,270 telephones were installed, and 159,758 were disconnected, resulting in a net gain for the year, exclusive of purchases, sales and transfers, of 48,512 telephones or 4.44 greater than the net gain in 1928.

Some of the important expansion projects completed during the year included the opening of the Niagara and Pingree dial central offices in new company-owned buildings in Detroit, and the completion of new central office buildings at Charlotte, Howell, Macatawa Park, Port Huron and Rockwood. New dial central offices were placed in service in Bad Axe, Charlotte, Howell, Ishpeming, St. Clair and Wayne. A second long distance cable was completed between Detroit and Ann Arbor, and a similar cable was placed between Grand Rapids and Marne.

The students who have been going without their hats all winter, might like to live in a house without any roof.

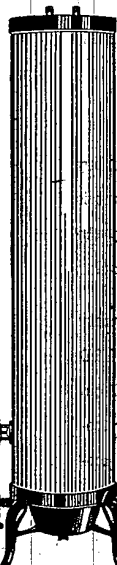

Success
seldom comes
to the man
who just sits
down and
hopes for it.

Would You Treat Your Furnace Like This?

There's no sense to this picture, is there? Yet you are doing exactly the same thing when you permit a furnace coil to steal heat from your heating plant. This coil cools down your fire, retards combustion and wastes your fuel dollars exactly like a cake of ice.

Years of experiment have developed a water heater that takes the place of this wasteful coil and gives you constant hot water summer and winter, night and day. It does away with the furnace coil forever.

This outstanding achievement in household conveniences can use only a small amount of gas and being built like a thermos bottle, the heat can't escape.

CONSUMERS SPECIAL GAS WATER HEATER
