ARE you denying yourself and your family the pleasure of electric cooking because of the belief that it is expensive? Have you said, as have so many others, "Electric cooking is ideal—if only we could afford it." Now you CAN afford it!

Cooking with ELECTROCHEF costs about one dollar per month per person—frequently less, seldom more. Ordinary care in the control of heat may greatly lower this cost. Focused radiant heat—a prime feature of ELECTROCHEF—brings unbelievably fast cooking, amazingly clean cooking, with heat as clean as sunlight. The semi-sealed oven seals in the delicious natural flavors that you have

never tasted before in foods unless you have enjoyed electric cooking! Meats and vegetables cook in their own juices. ELECTROCHEF's light, fine-grained cake and flaky pastry will delight you.

People who see ELECTROCHEF ask how it can be offered at the low figure for which it now sells. ELECTROCHEF is being introduced at this price because of The

Detroit Edison Company's desire to encourage electric cooking in the homes of its customers. It is only possible because of long planning by engineers and the use of mass production methods. See this remarkable range today—at any Detroit Edison Office.
