To Drive the World's Greatest and Most Economical Automobile

THE FORD

LOWER PRICES—EASIER TERMS
REDUCED FINANCE CHARGES

One of the best ways to economize this next year is to own and drive the world's most economical car—the New Ford. The Ford has been built for the great multitude. It is large enough for the family, but small enough for the individual to run and care for. It is constructed of the best materials, after the simplest designs that modern engineering can devise. And it is so low in price that any man making a fair salary can own one.

To you who must own a car, the Ford makes it possible to drive economically. The lower prices place it within the ownership of all. The flexible, easy arrangement of terms meets any requirements. The reduced finance charges provide in a larger degree more economical transportation.

Why not discuss with us the ownership of this fine car. In addition, the personal interest and attention of Olin Russell is available to every visitor or customer.
