Lena Shepley is quarantined with scarlet fever.

Mr. and Mrs. C. W. Wilber, Miss Catherine Sprague and Miss Mary Power attended a performance at "The Rivals" in which Madam Fiske is starring.

PLAN MEETINGS ON WEED CONTROL ALL OVER STATE

One Gain In Rural Life Meet Disapproval Of Agricultural Agents

One increase in farm population, the number of species of troublesome weeds on farms, is going to meet efforts aimed toward drastic restriction in the weed control meetings which will be conducted by county agricultural agents in Michigan counties this year.

Records in the botany department at Michigan State College list 47 varieties of weeds present in the State in 1899. The present list contains 147 varieties, or an average addition of one new pest each year for the past century. The botany department believes that the principal source of introduction is crop seeds grown in other sections of the country and purchased for planting in this State.

The principal subject for discussion at the weed meeting will be how to control the weeds now in the State. Chemicals are becoming popular as a means of killing the most troublesome weeds, and a demonstration of the use of the chemicals will be made at each meeting.

Specialists from the farm crops department at the College will give the chemical demonstrations and tell the results of several years' experiments with chemicals in controlling weeds on the college farm.

Counties where weed control meetings will be held are Midland, Mecosta, Allegan, Saginaw, Huron, Tuscola, Livingston, Macomb, Oakland, Eaton, Alpena, Montcalm, Lake, Manistee, Wexford, and Sanilac.

TELLS OF BIRTHPLACE OF GREAT EMANCIPATOR

Rev. Sidney D. Eva, of Mt. Clemens, lately returned from a brief visit to the birthplace of Abraham Lincoln, was in Farmington for a time Tuesday.

Rev. Eva gave his friends a very interesting account of his visit to the site of the Great Emancipator's birthplace at Hodgenville, Ky.

DOG TAX COLLECTOR

Howard Eisenlord of Farmington has been appointed to collect the dog-tax in this area, his territory covering Farmington Township and City.

The sparing of the steering rod never spoiled any child.

The Empty Purse Speaks

"I am the empty pocketbook and my number is legion. I am the result of carelessness, indifference and lack of foresight. I am always embarrassing people at the most urgent moments. Of course I would find it hard to exist if people took out insurance against me by opening a savings account. If you don't like me, a savings account will appeal to you. In that case I would suggest you make inquiry at the institution below."

Rural Women Planning For Annual Vacation

Michigan farm women will have their fifth annual week of entertainment and study at Michigan State College from July 26 to August 1, according to plans made by a committee representing most of the rural women's organizations in the State.

The plans of the week are based on the theory that every farm wife is entitled to a short vacation. Children and husbands are to be left at home to conduct the household and to find by actual experience just how much effort each farm mother expends in making a home for her family.

To keep the women from becoming homesick while at the College, a course of study has been arranged which covers child development, health, music and reading. Recreation periods will interrupt the studies often enough to keep the studies from becoming monotonous.

YOUTH OF 19 GETS 50 DAYS FOR TIRE THEFT

Fifty days in the Oakland County Jail was the sentence given Walter Boomer, age 19, this week for stealing tires. The sentence was imposed by Judge Rendell of Orchard Lake. Boomer was arrested by Deputy W. E. Coe on complaint of E. V. Mercer of Walled Lake, who noticed the tires Boomer was putting on a car he had purchased of a Walled Lake garage where tires taken of Mercer's trailer.

Boomer is the son of Mr. and Mrs. Joseph Boomer of Milford, formerly of Walled Lake. He had been employed by Orin Benjamin for the past few weeks.

A Maxwell sedan was stolen from the used car lot of M. G. Post of Walled Lake on Friday night of last week. Deputy Coe happened to notice the car as it drove out on the Pontiac road as the driver was acting suspicious. He noted the number of the machine for future reference.

When the theft of the car was reported the next day by Mr. Post he recalled the fact that he had seen the driver and car, but efforts to locate them were unavailing.

CONSIDER FARMINGTON TO WALLED LAKE BUS

Consideration of the application of Frank Capri to operate a bus line from Walled Lake to Pontiac and from Walled Lake to Farmington was given Thursday A. J. Skivington, of the F. W. Pearce Company, told the Walled Lake Exchange Club on Tuesday.

The only objection presented, he said, was to the picking up of passengers between Keego Harbor and Pontiac, this section being served by the Eastern Motorbus Co.

It is expected the Utilities Commission will approve the franchise and that service will start within a few weeks.

In 1925 one motorist lost his life at "grade crossings" out of every 9,000 registered. That in Great Britain only one out of every 55,000 and in France one out of every 45,000. There are 232,755 grade crossings in the United States and but 27,161 have protection of any kind.

PLEASE BE CAREFUL

The trailing arbutus, one of the loveliest wild flowers known, is beginning to flower. Braving the cold northwest winds, its fragrant pink and white blossoms can be found in many pine groves.

The arbutus is not easily transplanted. It must grow in setting of pine needles and sand. If a plant is pulled up by the roots, it is gone, never to be replaced. When you gather arbutus, use a sharp knife, or better still, a pair of shears, and cut off the sprays.—Michigan Bulletin.

ENAMEL 'SHOT' PAINTS OAKLAND CAR SPOKES

Science and mechanical ingenuity have developed a new and spectacular process for enameling automobile wheel spokes infinitely faster and more satisfactory than the old-fashioned method of daubing the finish on with a hand brush. The operation is completed in less time than it has taken to read this paragraph. Oakland has installed a battery of eight spray booths, each attended by a specially-trained operator. From the front of each metal booth extends a flaring funnel with a ball-bearing spindle its center somewhat similar to an automobile axle. The operator takes an unfinished wheel from a supply at his side, slips it on the spindle and gives it a whirl as one might spin the wheel of a jacked-up automobile. Then he pulls the trigger of his compressed air enamel spray gun. A blast of color covers the spinning wheels. Quickly reversing the wheel, he directs another blast at the other side and thus operation is completed. Fumes from the sprayed enamel are drawn off through the funnel by the suction of motor-operated fans.

AMONG THE FIRST TO USE SHIP-TO-SHORE SERVICE

The New York World was the first newspaper to take advantage of the ship-to-shore telephone service, its call being the second one to be filed after the ceremonies opening the service to the Leviathan. The Cincinnati Times Star was the first newspaper to be called from the Leviathan, its correspondent, Miss Ada Wheel, corresponding with its managing editor on Monday, December 9th, the day after commercial service was opened.
