

The motor industry will spend 15,000,000 for safety and will scrap 400,000 used cars in 1930 which are unsafe to drive on the highway.

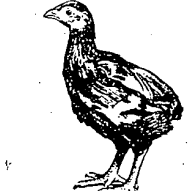

### It's Too Nice For This!

The weather's too nice now for you to spend time under the car. Bring it in to us and let us put it in first-class shape. We can do it quicker and better because we have the equipment and experience we specialize in GOOD REPAIRING. The cost is moderate.

### ADDITIONAL LATCHKEY NEWS

**EDITORIAL**  
Do you get your pencils from the pencil machine in the hall? That machine is operated by the student council for the convenience of the student body. They urge you to make use of it.

But last week it was discovered that one used the machine with the intention of getting a pencil free. When the council treasurer opened the money box he found a slug about the size of a nickel that evidently had produced a pencil to the buyer. This kind of student is urged to buy his pencils at a store.

Perhaps the one who used the slug did at a joke and was just trying to be mischievous. However, high school age is too late for such serious joking. That person may not realize it but everything he does shows up his character and forms good or bad habits. Cheating a slot machine is not a crime but one who would cheat a slot machine would cheat a blind man.

Imagine yourself an old, crippled man who must squat on a busy street corner with a tin cup, holding it out to the pedestrians that he may have food to eat. Would you laugh if someone slipped a slug coin into your cup?

We hope that from now on the treasurer of the council can safely go to the pencil holder and pick out nothing but nice shiny nickels.

### IN TYPING MEET

Alice Westfall, Virja Jean McCaffery, Alice Parker, and John Lapham are the Farmington High School students who will enter the District Tournament at Lapeer, Saturday, May 3. This will be the first time the F. H. S. has been represented in this event.

Alice Westfall is the most outstanding of the advanced class and has several times typed over 55 words a minute. Alice Parker and Virja Jean McCaffery have both done between 50 and 55 words a minute. And John Lapham, the only boy on the team and a beginning student, has typed over 40 words a minute with but one error, which is ten words better than any other member of his class can do.

The team will be back on the same day of the contest.

### GOLF PROSPECTS

With three veterans on the team and good candidates being for the opening berth, the golf team should show some sparkling performances this year.

The veterans are John Lapham, Ray Fendt, and Ivan Cox. Lapham played the number one position last year. The number 2 position went to Fendt; Ivan Cox will take over the other position on the team.

Joe Gravin, Don Walters and Roy Young are the candidates for the other position.

**BALL FIELD RECONDITIONED**  
Baseball games for this season will be played in back of the school. The field has been reconditioned and a comparatively smooth infield has been laid out.

A large backstop has been set up behind home plate which will be a big aid to the players and spectators. The field will be in good condition for the opening game, when Wayne plays here.

### PERSONALS

Myra Killom, senior, was absent Tuesday, Wednesday and

### Thursday on account of illness.

Because of illness, Donald McCleider, freshman, was absent the latter part of last week.

Kenneth Soyer, a student of Northern High School, and a former student of F. H. S., visited school last Friday.

Ben Starkey, a sophomore, was absent from school Monday and Tuesday of last week.

The Junior class are collecting papers every Saturday.

### ALUMNI

William Starkey, '28 is now played by the local A & P store.

Howard Middlewood, '28, has left college for his term and is working for the County.

Kathryn Banfield and Shirley Zwalhen, class of '29, visited school Friday morning, April 18.

### QUARTERS GO OUT FOR WORTHLESS CLIPPING

Posing as legitimate clipping bureaus, one or two disreputable out-of-town organizations are running a petty but expensive racket with the public footing the bill.

Victims receive a postcard stating that for 25c a "news clipping" will be sent them in which their name is mentioned. This is a suit instituted—but no "news" as it is ordinarily understood by the public.

Federal authorities are investigating, but it will be well for you to be on your guard.

Nothing herein is intended to reflect on legitimate clipping bureaus selling bona-fide news articles to individuals mentioned in them.

Before You Invest—Investigate!—Better Business Bureau.

O. What Admiral entered the United States navy at the age of nine?

A. David Glasgow Farragut, 1871.

"Work hard" is useless advice and it isn't much information.

### College Is To Hold Annual Chick Show

The third annual baby chick show will be held at Michigan State College, May 13, 14, and 15, according to an announcement by the poultry department at the College.

Entries in the show will consist of 25 chicks of any one breed. The chicks must be sent to the College by mail or express to be eligible for entry. This is done to determine how the chicks stand shipment. Chicks should not be fed before being shipped to the show.

All chicks entered will become the property of the show management and will be auctioned off on Thursday afternoon, May 15.

Turkeys, ducks, geese, and pheasant classes will also be included in the show and newly hatched birds of these species will compete for prizes.

A long list of silver trophies is waiting for the prize winning entries in the show.

The annual meeting of the Michigan Poultry Improvement Association will be held Thursday, May 15, at 10 a. m.

### TREAT THEM RIGHT

The 1930 tourist season is no so many weeks away. Ahead cars bearing license plates from outside the state may be seen of the highways and by the end of the month the annual invasion of summer visitors will be well underway.

Michigan has everything to offer in the way of climate and scenery—it is the summer playground of the world. And now is a good time to begin preparing for their welcome. Tourist associations, aided by the state, are spending many thousands of dollars asking these people to spend their vacation days in Michigan.

As hosts we should do everything possible for their comfort and pleasure while they are here. Don't make a practice of overcharging the stranger, thinking he will not be coming your way again. The satisfied tourist returns another year bringing with him his neighbor and friends. The tourist business has grown

### WEST FARMINGTON

Mrs. Irvin Knapp PHONE 46P4

Mrs. Emma Kurtz attended a federation meeting at Detroit on Tuesday.

Several from here attended an agriculture banquet held at Wall-Lake Tuesday evening. The extension groups on home management from Michigan State College will hold their annual achievement day program at the Central Methodist Church at Pon-tiack, Mich., on May 10. Dinner will be served in the church. Several very interesting speakers will be present.

Dorothy Russell, who underwent an operation at Harper Hospital, is doing nicely and is expected home soon.

Q. When did the Hague Conference take place?  
A. May 18, 1899 at the Hague.

Q. When did the "Hamilton-Burr" duel occur?  
A. July 11, 1804.

### OAKLAND 7 Days COMM. THEATRE PONTIAC

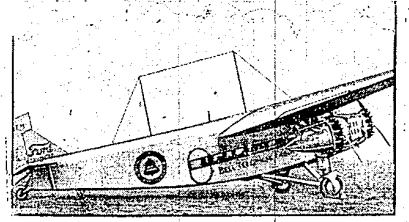

The Outstanding Song-Romance of All Time, Surpassing Anything Ever Before—

## DENNIS KING "The Vagabond King"

More gorgeous than anything you ever hoped to see! The immortal love-story as only the perfect ALL-COLOR, talking screen could bring it to you. Unfolded in thrilling action, in glorious song. Ziegfeld's own star, Broadway's own idol sings the rousing "Song of the Vagabonds." You hear his golden voice sing Rudolf Friml's lilting love lyrics, "Only A Rose," "Love Me Tonight," "Some Day." You see his enthralling love making. With lovely JEANETTE MacDONALD, queen of "The Love Parade."

COMING—WM. POWELL in "Street of Chance"

### A Flying Radio Laboratory For Use of Bell Scientists

Showing One of the Two Laboratory Benches With Which the Plane is Equipped.

A FORD tri-motor all-metal monoplane of a type having a rated capacity of fourteen persons has been added to the facilities of the Bell Telephone Laboratories in New York City. This is the largest and most complete flying radio laboratory in the world and its purchase by the Bell Laboratories follows its established policy of making pioneer studies in all phases of electrical communication.

The plane has been specially designed to adapt it to research work and will be used for the development of radio apparatus for aircraft communication from the earliest experimental stages through to the final testing of the apparatus under actual flying conditions. It has been equipped with two large laboratory benches for the convenience of the men who will carry on development studies and has a variety of antennas, including two trailing-wire antennas and two stream-lined verti-

cal rod antennas mounted on the plane. Supports have been erected on the wings for the mounting of various experimental types.

The motors of the plane are arranged so that engine-driven generators may be used for supplying power either directly to the apparatus or to storage batteries. Suitable mountings for wind-driven generators have also been provided, as well as a Western Electric Company two-way radio telephone system for communication with ground. This latter apparatus is capable of operating anywhere on the frequency band from 1500 to 6000 kilocycles. The plane also will have a low frequency receiver to operate on a 250-500 kilocycle band.

In addition to developing radio apparatus, the plane will be used to measure the strength of radio signals under various conditions. To make the plane more useful for the purposes for which it is designed, several specific features have been built into it. The plane also is equipped with an intercommunicating telephone system to permit people in various parts of the plane to talk with one another as well as with ground.

### Be Sure Of Your MILK

More and more is MILK becoming necessary to the standard of living and as an article of diet it is becoming the most valuable article of diet—morning, noon and night.

We handle only the best Milk from tested cows. We want you for a customer and your desires will be met by prompt deliveries.

### The Farmington Enterprise

### \$7,000,000 Paid In Claims Over 100,000 Claims Paid In Michigan Since 1915

By CITIZENS MUTUAL AUTO INS. CO.

The toll of death, personal injury, and damage to automobiles falls heavier on the Michigan residents each year. By fair dealing this company has increased its business throughout Michigan since 1915. The company is now paying about five hundred claims, totaling \$25,000, in the main counties of Michigan.

When you have a serious claim, you have the benefit of a state-wide organization and you can also take it up with the home office.

It pays to insure with a successful Michigan company with fifteen years of experience. Assets, January 1, 1930, over \$1,000,000.
