Blizzard Tale Explains Skates On Hot Day

Residents of Farmington who happened to be in the business section early last Saturday afternoon, amid the none too moderate heat, suffered the shock of years, if not of a lifetime, to see Edgar S. Pierce walk across Farmington road carrying a pair of ice-skates, attached to skating shoes.

Investigation disclosed that some years ago, on a winter day that was as cold as last Saturday was hot, friends of Mr. Pierce suggested that they all go skating the next day. Not having skates, he hurried over to a hardware store and bought a pair.

The next morning brought a blizzard and the skating-party was off. The skates had reposed in a drawer in his office ever since, until a "clean-up" unearthed them.

It is hoped that friends of Mr. Pierce who saw and gasped Saturday, and started worrying what with the heat and all, may rest easier now.

Ford Finance Plans Make Popular Appeal

Universal Credit Company is now observing its Second Anniversary. This Ford financing organization provides uniform time payment plans at low cost for purchasers of Ford cars who desire to pay for their transportation as they use it. The approval accorded the UCC Plans by dealers and public has been complete with the result that millions of dollars have been saved for Ford purchasers thru the lower finance charges of the UCC Plans. An estimated saving of approximately \$30,000,000 has been made for customers of Ford dealers during the past two years through the lower time sales charges created by UCC for the benefit of the public.

The organization of Universal Credit company conforms squarely with the established Ford policy of creating and developing every possible economy for the purchasing public in order that the Ford Car be available to the greatest number of people at the lowest possible cost.

UCC has succeeded in reducing the cost of credit to the purchaser of a Ford Car who chooses to pay for transportation out of income as this company operates on the basis of a small profit on a large volume of business.

Universal Credit Company now has thirty-two Branch Offices established throughout the country and employs nearly two thousand people. The company has successfully handled a volume of business in excess of \$425,000,000 and has passed on important economies to nearly 800,000 time purchasers of Ford cars who secured the advantages of these Authorized Ford Finance Plans during the last two years.

The UCC organization is vitally interested in the important question of creating additional goodwill for the Ford dealer and the Ford product with resulting courteous, quick and confidential credit service for the customer. A standard fire and theft insurance policy for one year is issued to time purchasers and the cost is included in the terms of the UCC Plans.

The social side of finance company operations should not be overlooked. In Universal Credit Company the management are always aiming at lower cost and broader markets with high standards for this specialized banking field. The development of suburban areas has been aided by consumer credit as applied to motor cars, making for less crowded cities and insuring to a greater number of families the beautiful surroundings of the countryside.

The convenient terms and low cost features of UCC Plans are available to Ford purchasers at Olin Russell, Ford dealer in this community.
