"We invade a new field with vastly improved cars at the lowest prices in our history"

BY WILLIAM J. McANEENY
President, Hudson Motor Car Company

We have built these models up to and beyond the 1931 standards of performance and quality in every way, and have never in our history offered so many improvements. Quality is greater down to the last detail. Every phase of performance has been greatly improved, and the luxury we have built into the cars is substantially greater than ever before. Motors are larger and more powerful. An efficient system of oil cooling is introduced. A marked improvement in carburetion increases flexibility and economy. Bodies are longer and wider. These cars possess the finest, easiest riding qualities. For the first time, such comfort is available at these low prices. Only great manufacturing economies and the fact that our large resources permit us to take the fullest possible advantage of reduced commodity prices have enabled us to offer the public the greatest combination of quality and low prices in our entire history.

Owner-Management Permits Exclusive Value Advantages
Owner-management enables Hudson Essex to give you outstanding advantages in quality and price. The men who are now guiding its destinies have been with the company since its inception twenty-two years ago. Its department heads and principal distributors are its controlling owners. Their independence is backed by unusually large resources in capital and plant facilities. It enables Hudson Essex to lead in design and engineering quality. It permits economies in manufacture and distribution that bring exceptional quality direct to the public at distinct price advantages.
