THE CROSLEY FIVER

A Five-Tube, Neutralized, Completely Balanced Superheterodyne
Laminated Dial, New Heater Type Tubes, Dynamic Speaker

Five tubes mean better radio reception—far superior to that offered in a four-tube radio. Five tubes make possible the virtual elimination of whistles and other similar noises. Five tubes provide more power, greater distance-getting ability and finer tone—so demand a radio with at least five tubes. Remember, you can't get five-tube performance out of a four-tube receiver.

In the CROSLEY FIVER you obtain a genuine five-tube Superheterodyne radio that has been completely balanced at the factory. It employs New Heater Type Tubes, which enable it to deliver performance heretofore impossible in a receiver of this size. It has a dial light, dynamic speaker and other features you would never dream of obtaining in a radio for its little money. Nowhere can you obtain as much value for less than \$20.00.
