WOLLD ON CHORAL

In Hill Auditorium Ann
Arbor

Around the Home By MARGARET BRUCE \8

aughed a house-wife recently.
"Great stress is luid on the imake-up of the firmily menis, but some way. I do, not no-tice that menis are very different, for a' that. Ourgrand-mothers served much the same

mothers served much the same foods that we do up, meat, potatoes or rice, a vegetable or two, celery, pichal a sweet to top off with. Exhat they are about twice as pt that they are about twice as ach as we do, the menu was approxi-ately the same. We call it a bal-iced diet, and they called it getting

anced olet, and they called It yetting inner!

"As a mater of fact, the well-bal-anced meal is not only mere whole; some and digeglible, but it tastes better. No one would want to eat two starchy foods at the same meal, evan if were good for him. The starchy foods of the starchy fo

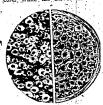

"So I just let.my family eat natu-rally, without much thought of vita-mines and chories. But one thing I do insist on, and that is at least-one green vegetable o day. And when I say I mean in green vegetable; it mean a green vegetable. I do not mean canned, corn, or lima beans, and I am sgmétures temptel fair, to include green peas with potatoes or rice, un-less they are very new and teader green peas with potatoes or rice, un-less they are very new and teader green peas with potatoes or rice, un-fless, to me, are storchy, thick foods, and not at all "green" in the sense that connects the word with arring beans, spinach, currots, parasips, sum-mer squash, beeth, celery, egg plant and other foods that are watery, as aughnet dry.

and other foods that are watery, as against dry.

"I do believe that the system needs its daily green vegetable in some form or other. If a saind is served, using plenty of lettuce, cress, or 'chicory, that will take the place of the vegetable. As 4500 ns possible in the spring I serve inhard, and all drying I serve inhard, and all drying I serve in the server in

There is a striking sandogy between any one of the cables where all the sandogs of the cables and the sandogs of the cables and the sandogs of the sandogs is effectively demonstrated when a photograph of the cross-section of, a telephone cable is compared with a photograph of a micrascopic enlargement of a transcrease, section of a human, spinal cord. While the nerves are not

Left: Photograph of microscopic en-largement of cross-section of humar spinal cord. Right: Photograph of cross section of telephone cable,

placed as symmetrically as are the wires in a cable, they are about as closely spaced and each nerve is en-closed in an insulating sheath, or medulls, in the same manner that the telephone wires are insulated

medulis, in the same manner that the telephone wire smalted with paper.

The simularity may be carried truther and mere physical resemblement of the spinal cord and the telephone cable are capadiered. The apinal cord of an individual is the conduit of the apinal cord of an individual is the conduit of the main nerres which, so out from the brain and over, which intelligence may be fashed to any part of the body. Scattered along, the spinal cord there are a number of aggregations; of nerve which control the ordinary actions of the physical memoirs, to out from these ganglia. In similar manner the long-distance cables of the medern, telephone plant conniet-physically, the videapread members and community, and the control of the mation. These cables connect the various local offices, which serve the body politic in the same way that the ganglia serve the human body. Each community handles ils, own bushers, through all tools office, instead or carging the care of "measures" originating in certain parts of the largelia take care of "measures" originating in certain parts of the low, and dispose of them'dy appropriate miscular action' without involving the brain at all.

"Little Stories for Bedfime by Thornton W. Burgess

PETER RABBIT KEEPS GUARD

NJOW there are some people who hink only of themselves and in times of, danger have no thought of others. But Peter Rabbit is jnot that hind. When Peter is drightened he always tries to warn others who may be near. Be does it by thumping the ground with those stort hind feet of Ma. Those thumps can be heard a long way by those whose ears are near the ground.

and perhaps in the mornios, after a good night's rest, Honker would self more stories. Now Honker was askeen out three in the pont of Paddy-the-Beaver. Buster Rear had gong abent his builtness for the inplict. So had Prichtly Porty." Juniper the Hare had gone also: Only Paddy was awake and he was too bury to talk.

Be Peter sat as still as still can

charming and attractive personality.

Vlad mir Honwitz, who will be heard in recital. Monday, March 6, is m newconser to Ann Arbor. His pieno recitals and his appearance with orchestra there, three seasond ago, won many friends for hith. In Europe he is halled as a siper human combination, of Rubinstein, Rosenthal and Paderewski. Four tears ago when he made this New fork debut, he was greeted with the "wildest welcome." In his lirst tour he made thirty-six appearances in reighty days, including inneteen orchestral priformances. Since then he has been confunously on stranuous durs throughout the musical world.

Ignate Jan Paderewski, the

be, thinking over what he had heard about Ghirton the Wolverine and Flathand about Ghirton the Wolverine and Flathand the Moose, and wondering what it would be like to be able to fly tile Hontler the Goose. He looked up through the like to be able to fly the Hontler the Goose. He looked up through the treetops at the twinkling registers are more than the rector of the state of the state of the state of the water. Where the Black Shadows had stretched themselves across the water he could 'Just see what looked like twelve blucker shadows. He knew that the, were Honker suph is followers.

"It must be great to be a leader like Honker, and have all the rest obey you," thought Peter, who, you know, negre, haps, been, a legader, in his life. "He must feel very auxious when he picks out a place to spied the night when, he is making these long journeys." It inth tile stopping in places that you know all about. Now he never has stopped here before, so how does he know what dangers there may be? Or course Buster Bear and Rady have told him that he will appear and of course steeping outputs you." It is not there have been and the water there. The man treep up and a long time Feter sat there. By and we he noticed that some of these water was the water to me of the plate of the state of the plate o And a carried an

her "Nathan the Wise."
There is, a tradition in Russia
that when a chill is born in
Odessa, it is handed a fiddle and
a silver appoon. If it grabs the latter, it will be a thief, if it chooses
the forter, a misjoian. In Milstein's case, he is said to have
"grabbed the fiddle with both
hands." Young Milstein managed
to survive the havages of the
great Revolution and finally utored with his friend Vladimir Horowitz, the juants: In 1925 he made
a sensational debat in Berlin and
two yeaks ago startled America
through this few introductor appearances in the great music centers."
Myra Hess is

Farmington Mayor Gets A Low Number

ters of this couttry. This season he will be heard ligain in a limit ed number of the more important centers.

Myra Hess is acclaimed the world over as he containing woman bianist of the generation. She will be heard Friday, January 27. Four years Ago in her Ann Arbor lecital, she made a host of friends, who have persistently demanded a return engagement. Heavy scheduler and absence from Alperica prevented a return engagenent until this time.

The Fudapest Quartet, made up of four distinguished artist performers Jose Raisman, 1st Voilin Alexancer Schmidder, 2nd Violin Stephen I poly, Viola and Mischa Schneider, Cello, is generally conceded to be the outstanding exponent of champer music in existence. They are natives of the "great gradle" of string ensembles. The organization was founded during the wix-time period and has been in existence continuously since that time. During this period help that was the great and concert they have been acclaimed wherever heard.

Signil Onegin it now generally conceded to be the greatest contrained wherever heard.

Signil Onegin it now generally conceded to be the greatest contrained wherever heard.

Signil Onegin it now generally conceded to be the greatest contrained wherever heard.

Signil Onegin it now generally conceding the will offer a program of her. Signil powers are all the same to her. Signil powers are all the same Mayor Lamb of Pasmington will have on his car this year one of those low license numbers that are coveted by many motorists.

Mayor Lamb did not seek the low number, and was qutte surprised when an infliential friend in Royal Oak telephoned him at the days ago and said the plates, were being held for him at the Royal Oak office of the Secretary of State, if he wanted to drive over and get them. So the number on the Mayor's car this year will be 0-158.
