(Continued from page one)

ter's children, provide the plot with a ceaseless round of meriment, punctuated here and there by such bits of heart-stirring character work as only the versatile Miss Dressler can give to her screen portrayals.

As is usual in the amusing Dressler-Moran family entanglements, one of the party has more money than the other and consequently makes herself obnoxious by her assumed "lais" and ill-disposed charity. Leave it to Polly Moran to make the most of this sort of role. As the one whose well-lined stockings has been unimpaired by the depression, she nobly welcomes her less fortunate in-laws into her home, with the result that vehement insults as well as crockery soon fly between the two mothers-in-law and the disorder reaches such a point that the married couple find themselves on the verge of a divorce.

Brings Good Times Back

Meanwhile, with the best intentions in the world, Miss Dressler gets herself and the rest of the family into all sorts of trouble, the climax of which occurs when she attempts suicide in order to collect on her insurance and thus save her son's reputation and the family honor. To be sure, all turns out happily in the end, with Marie even carving herself out a niche in the hall of fame as a result of her successful scheme to bring prosperity back to the town.

Together with Miss Page and Foster, the stars are supported by Charles Giblyn, Frank Darin and Henry Armetta, with the roles of the two grandchildren filled by Jacquie Lyn and Jerry Tucker.

COUNTY HIGHWAY TAX CUT TOTALS 22.62%

Taxes for highway purposes in Oakland County have been reduced 22.62 per cent in the past year, according to statistics compiled by the State Highway Department last Friday.

Economies instituted by the County and Township officials and laws adopted by the legislature, made the reduction possible.

In 1931 the total county tax was reduced to \$1,819,402.25 in the last year. This includes reductions in county, township and Covert Road levies.

The total reduction of local highway taxes in the State amounted to 63.5 per cent.

Passengers on Dozen Ocean Liners Can Talk with Land while in Mid Ocean

The twelve ships sketched on this map are all equipped with ship-to-shore telephone service. They are the S. S. Leviathan, Majestic, Olympic, Homeric, Empress of Britain, Monarch of Bermuda, Deutschland, Bremen, Europa, Albert Ballin, Hamburg, and New York.

During the past summer, the number of transatlantic liners having radio telephone service with North American points while the vessels are at sea has doubled. The addition of six vessels of the North German Lloyd, and the Hamburg American lines brings the fleet of liners so equipped to a round dozen. As in the case of the six ships already included in the ship-to-shore service, the newly added vessels reach the Bell System land telephone lines through the radio telephone stations of the American Telephone and Telegraph Company at Forked River, N. J., and Ocean Gate, N. J.

Can Reach All Bell Telephones—Each vessel while at sea is able to reach all Bell telephones, as well as those connecting with the System in the United States, Canada, Mexico, and Cuba. Through ship-to-shore telephone stations in Europe, the liners may hold conversations with points in the British Isles and on the continent of Europe.

The first of the vessels to be recently included in the service was the S. S. Deutschland, which was added to the telephone-equipped fleet early in May. On June 7 the Bremen was added to the list, followed within a few days by its sister ship, the Europa. During the next four weeks the Steamships Albert Ballin, Hamburg, and New York were included in the service, in the order named.

Voices Switched to Land Lines—The apparatus on all six of these liners is owned and operated by D. E. B. E. G., the German radio operating company. A voice spoken into a special ship-to-shore telephone on any of the vessels while en route to or from this country speeds by short wave radio to the Forked River receiving station of the A. T. and T. Company. Here the radio waves are demodulated, and the voice waves pass over land wires and cables to the control room in the new Long Distance Building at 32 Sixth Avenue, New York. At this point the ship-to-shore operator

routes the call over the appropriate long distance line to its destination. The answering voice follows the same route back through the Long Distance Building in New York City, thence traveling over land wires and cables to the ship-to-shore transmitting station at Ocean Gate, N. J. There, by means of directional antennas aimed at the ship's course, the voice is dispatched by short wave radio to the liner as it plows through the waters of the North Atlantic.

Service Was Begun in 1929

The first vessel to be equipped for regular commercial ship-to-shore telephone service was the Leviathan, to which service was extended on December 8, 1929. The following Spring the service was extended to the Majestic, Olympic, and Homeric of the White Star Line. Last year, service was opened with the Empress of Britain of the Canadian Pacific Line, and the Monarch of Bermuda of the Bermuda Line.
