AUTO SALES GAIN

Lansing.—The sale of automobiles in Michigan has shown a steady gain each week for the past six weeks according to records of the Department of State. More new and used automobiles changed hands last week than during any week since June 1, 1932, while registrations of new automobiles alone were more than 250 per cent. For the week ending July 2, 1932 a total of 3,505 were reported sold. But the next week the sale dropped to 1,316 cars. From that date there was a steady decline in sales until the last week of November 12 when but 317 new cars were registered. From that date the demand continued to increase until the week ending February 11, 1933, the last before Michigan's bank holiday was declared. During that week 1,626 new cars were sold while the next week the sales dropped to 865.
